

Step 5 – How to add and change Extensions with Internet Explorer.

- As I mentioned in the Introduction, if you download a program from ninite.com, it is safe and it does not add Extensions. If you download a program from another website, sometimes it adds an Extension and it may not be safe. Also, when you click on a link in your e-mail or a website, sometimes it adds Extensions. That's why you should check the Extensions and check them again after you download a program.**
- Next I will show you how to get to Extensions and disable them or remove them. Make sure Internet Explorer is open.**

- You click on the Icon in the upper right that I showed you in other Steps and then click on Manage add-ons. Next is what happens.

- A new window opens and you see a list and I recommend you click on Currently loaded add-ons and click on All add-ons. Next is what happens.

- You then see a full list of add-ons. To Disable one, you click on Enabled. Next is what happens when you click on it.

You see Server Error on the default Browser. I tried to change the URL. Next I will Zoom in so you can see it.

You see the URL. I decided to delete the en and the / and clicked on the Ender Key to see if it works. Next is what happens.

It worked and you see Internet Explorer Gallery. I typed in Read Aloud in the Search and next I will Zoom in so you can see what happens.

The screenshot shows the Microsoft Edge browser interface. The address bar displays the URL <https://www.microsoft.com/en-us/iegallery>. The page header includes the Microsoft logo and navigation links for Office, Windows, Surface, Xbox, Deals, Support, and More. A search bar labeled "Search Microsoft.com" is visible, with a red arrow pointing to it. Below the header is a large blue banner with the "Internet Explorer Gallery" logo and text. The "Add-Ons" section features logos for Bing, eBay, Google, and GraysOnline. Below each logo is a brief description of the add-on's functionality and a link to its website.
