  - **Google AdSense**
  - **Social Icons**
  - **RSVP Form**
  - **Survey**
- **Pro Versions**
  - **HD Video**
  - **Audio**
  - **Search Box**

**Next is Other Elements Details**

# Other Elements Details.

- **Newsletter Form is an Element that creates a Form for people to put an e-mail and Subscribe to Newsletter. You then get the e-mail and you send a Newsletter, like an attachment, etc. You can just use a Contact Form. You can try it, but I don't use it.**
- **Document is an Element that allows you to upload a new file. I use Embed Code element to Embed documents from Google vs. Document Element.**
- **Next is others.**

- **Flash is an Element that allows you to upload a SWF file. SWF is a file extension for a Shockwave Flash file format created by Macromedia and now owned by Adobe. SWF stands for Small Web Format. SWF files can contain video and vector based animations and sound and are designed for efficient delivery over the web. I never used it.**
- **File is an Element that allows you to upload a file, like PowerPoint. Once you upload, it shows the file and a Download that people can do.**
- **Next is others.**

- **Categories is an Element that is part of the Store. You have to go to the Store to set them up and you have to upgrade.**
- **Google AdSense is an Element has a window that shows - Google AdSense helps you generate revenue from your website by automatically showing contextual ads targeted to your site content. Weebly does not take any cut from the revenue generated. To setup Google AdSense, connect your account by clicking "Authorize".**
- **Social Icons is an Element that shows Facebook, Twitter, Instagram, LinkedIn, Mail icons that you have setup. You can always remove some them also. I recommend just using Text and add links or use External Link Page.**
- **Next is others.**

- **RSVP Form is an Element that is like Contact. It is people to respond to meetings, etc.**
- **Survey is an Element that is also like Contact. It is people to give there Survey to presentations, etc.**

**Next are the Pro Version Elements.**

- **Pro Versions**
  - **HD Video** – you can upload your own video. The free option is upload your video to YouTube and use YouTube element or Embed Code.
  - **Audio** – you can add your own music. The free option is to embed music from YouTube that I will show in Step 4.
  - **Search Box** – it allows people to search you site. It works well if you have a lot of pages.
- **This is the End of Step 1 – Part 2**
