

Step 2 – Change Background Color – Part 1 – Full Background

- **Weebly updated the Themes to allow changing some background color.**
 - **Navigation background**
 - **Almost all new themes allow full background color on Sections, which is on pages. Step 2 – Part 2 shows that.**
 - **The Older Themes allow full background image color outside the pages. The new themes don't allow that. They do show Older Themes, if you have a older account. If not, there is a link in the Tip – How to find Lucent Theme and Edit it is in the first on-line training.**
- **Next is more about the Tip.**

Tip – How to find Lucent Theme and Edit it

- As I mentioned before, the Tip is in the first on-line training.**
- It shows you how to find the Lucent Theme, if you have a older account. If you have a newer account, you may not find it. That's why the Tip also has a link to get to that Theme.**
- It also shows you how to change the Full Background in that Theme. The Background is an image. But, it shows you how to create an image with just Full Background Color. I recommend you use that Tip. This is the End of Step 2 – Part 1.**
