

# **Step 3 – How to add a table with background color Introduction**

- **You have 3 options**
  - Use free program called NVU
  - Use Google Drive
  - Use OneDrive, which used to be SkyDrive
    - Note – iPad/Apple may not see OneDrive table
- **I recommend NVU or Google Drive vs. OneDrive, which I will show you.**
- **Note – the reason is that Weebly does not have a table element.**
- **Next explains the difference between NVU and Google Drive.**

- **If you want a table with a lots of rows, Google Drive is easier then NVU. I recommend you do Google Drive for lots of rows, like meetings.**
- **If you want a table with just one row with one cell with a Border, like frame, NVU is easier then Google Drive. I recommend you do NVU for just one row and one cell.**
- **Note – you can create an Image with PicPick that is similar then the one I will show you with NVU and will show you PicPick in Step 3 – Part 1.**
- **This is the End of the Step 3 Introduction.**
