

Options to backup your Folders on your Computer.

- You have options to backup Folders on your Computer.**
- The options are Flash Drive, CDs, DVDs, Blu-Ray Disks, Clone Hard Drive, External Hard Drive, or Online Cloud Backup Service.**
- It depends how much you have on your Computer.**
- If you have a lot of Documents, Music, Pictures, and Videos on your Computer, Flash Drive, CDs, DVDs, Blu-Ray Disks will not work.**
- Next explains more.**

- **Because I have a lot on my Computer, I use the External Hard Drive. The one I have came with a program on my Computer that automatically backs up all Folders on to the External Hard Drive and it takes time to do that. Once it is complete and you add new on your Folders, it automatically backs up the new ones, which is very good.**
- **Note – I decided to have another External Hard Drive. It is similar then the first one. So when I unpluck the first External Hard Drive and add the pluck in the new one and open the program it automatically backs up all Folders. Next explains why I do that.**

- **Once the new External Hard Drive is complete, I unplug it and plug in the older one and take the new one to the Safety Deposit Box in Citizens Bank. I then pick it up once a month and Backup up the new ones on my Computer and put it back to the Safety Deposit Box.**
- **The reason I decided to do that is something happens with the first External Hard Drive or someone steals it.**
- **Next explains Online Cloud Backup Service.**

- **You have a lot of options for Online Cloud Backup Service.**
- **If you have a Microsoft account, you can use OneDrive, like I do for Pictures and Videos to share with my Family. When I am Vacation, I use it for Backup of new Pictures, etc. When I get home, I put them on my External Hard Drive and delete them on OneDrive.**
- **If have a Google account, like Gmail, you can use Google Drive for Backup.**
- **The other option is Dropbox, but not as much space as OneDrive and Google Drive. Next is more options.**

- **Google Photos allows you backup Photos and Videos and it is unlimited for free.**
- **Some of the other ones are free and some of the other ones are not free.**
- **You can do a search on your Browser to find other Online Cloud Backup Services.**
- **This is the End of the Options to backup your Folders on your Computer.**
