Step 10 - Save Image or Copy and Paste or Print

- If you Screen Capture with PicPick, like I showed you in the other Steps and you want to Save it to your computer, you can save it on PicPick.
- Or, if you want to send it on your e-mail to friends or family, you can Copy it and Paste it on your e-mail. The other option is to Copy it and Paste it to another program, like PowerPoint or Word, like I do for my online training. After Same Image, I will show you how to Copy and Paste on e-mail.
- Or, if you have a Printer and want to Print the Screen Capture, I will show you how to do that after Copy and Paste.
- Next is a sample of a Screen Capture with my Website that I did with most of the Steps with Videos.

 Here is a sample of Screen Capture with PicPick.
 To Save, click on File in the upper left and next is what happens.

100	VCB Computer Basics Help people get started and move to the Next Level!!! Home Page Definitions Tutorials About Contact	T	^						
Home Page Definitions Tutorials About Contact The purpose of Computer Basics is to help people get started and improve to the next level. The Definitions page explains about Computers. To improve to the next level I recommend you hover over Tutorials and click on the Getting Started page to practice the on-line training. After that, got to other pages under Tutorials to practice other on-line training. I use to have Courses on this website, but I decided to create a new website that has Courses with on-line training. Click HERE to go to my other website.									
- <	The Villages Computer & Associated Technical Clubs website has a list of Computer		> *						

Page changes and on the left you see Save. You can then click on Save and next is what happens.

 Page changes to Save As. I recommend you click on JPG, except if it is a Capture Scrolling Window. Next explains about Capture Scrolling Window.

About				

 Capture Scrolling Window is large. I will show you how to Capture Scrolling Window in Step 6. Next is what to save when you do Capture Scrrolling Window. When you do Capture Scrolling Window, you click on File again and I recommend you click on PDF, because it is easier to view it with PDF file Reader. Next explains more about it.

- If you don't have a PDF file Reader, I recommend you download Foxit Reader with ninite.com.
 When you hover over Courses in my website again, there is a Ninite Page that has a Video that shows how to download Foxit Reader and other programs on ninite.com.
- Next is what happens when you click on JPG vs. PDF.

A new window opens, like File Explorer with a Folder. The Folder may be different on your Computer. Also, the File name may be different. Next explains what to do.

 If the Folder is not Pictures, I recommend you click on Pictures on the left under This PC. If the Folder is Pictures, like I have, I recommend you click on New folder in the upper left, which is next.

When you click on New folder, you see a New
 Folder and the name is highlighted. You can
 change the name by typing it what you want. Next
 is a sample of changing the name.

 Here is a sample of changing the name to ScreenCapure. You then have to click on it or sometimes double click on it to open that Folder, which is next.

 It changes to that Folder. You can also change the File name. You have to Highlight it, which I did and type in the name you want. Next is a sample of changing the File name.
