

Step 12 – Music in Create Video Introduction

- If you want to add Music on your Video project and you don't have Music on your computer, you can download Free Music using Step 3.**
- If you add a Video to the Video project and it has Music on your Video that you want, and you don't add Pictures, you don't need to add other Music. You can increase the Volume of the Music on your Video.**
- Next explains if you add Pictures.**

- **If you add Pictures and want to add other Music, Photos App allows you to add Music, but it starts at the beginning and adds Music on the Video and Pictures, which is not good. That's why to Mute the Music on your Video, before you add other Music. But, there is other options to add Music on Pictures, which is next.**

- **If you like the Music on your Video and you want to add the same Music on the Pictures, you can Extract the Music from your Video and then add it on the Pictures. There is a Tip that shows you how to Extract the Music from your Video. I recommend you first add the Video on the Create Video project and then add it two times as I showed you in Step 8 without Trim and then Export it to a Video, which I will show you in Step 13. Then Extract the Music. Next is the reason why to do that.**

- **The reason to do that is it increases the Music, so you then can do another Create Video project and add the Video again and Pictures and Mute the Music on the Video and add the Music you Extracted and it will play the Music on the Video and the Pictures.**
- **I decided not to do that and just Mute the Music on the Video and add another Music that I downloaded with other Pictures. Next is about your own Voice.**

- **Movie Maker allows you add your own Voice, but you can add your own Voice using aTube Catcher. The reason to add your own Voice is to add it on Title at the beginning. If you just have a Video with Music and not have Pictures, you add just your own Voice on the Title and keep the Music on your Video. If you add Pictures, I recommend not doing your own Voice.**
- **This is the End of Step 12 Music Introduction.**
