Step 1 - Part 3 – How to Download Free Music with Firefox Browser

- If you don't have Music on your computer at home, you can download Free Music on your Computer. You have a lot of options. The first option if you have a gmail, you can go to YouTube and download Free Music. If you don't have gmail, you have to create a Google account to download free music from YouTube. I will first show you a sample of gmail and how to get to YouTube and download Free Music.
- Second option is download Free Music from different Websites. I will show you that later.
- Third option is download Music using aTube Catcher, but there may be copyright issue. I will show you that on the Step 3 Part 2.
- As I mentioned before in my Why I download Music on my Computer PDF file, Movie Maker has 3 links to websites called AudioMicro, Free Music Archive, Vimeo, but most of them you have to create an account, except Free Mustic Archive. Next is a sample of gmail account.

- If you have Gmail, you click on the in the upper right and you see a list and click on YouTube.
- Next is what happens.

 A new Page open with YouTube and you click on you account icon in the upper right, like I did and then click on YouTube Studio.

• Next is what happens.

It then starts to change the page. When finished the page goes to Channel Dashboard page. You then have to hover over the line next to Dashboard on the left, like I did and then Click on it and hold it down and drag it to the bottom.

 Next is a sample of dragging it down.

- Here is a sample of dragging it down.
- Then you hover over Other features, like I did and you see a list and click on More at the bottom and next is what happens.

A new page opens called **CREATOR STUDIO.** Then click on **CREATE** at the bottom of the left and next is what happens.

 Page changes and you see Audio Library with music with NEW ones. Next explains the Audio Library.

 Because the Music is on the Downloads Folder, it is not easy to find it. That's why I recommend you go to the Music Folder and create a New Folder and then move the Music from the Downloads Folder to the New Folder under the Music Folder. Once you do that, it is easier to find the Music. Next is how to do it.

You first click on the Music Folder on the left and next is what happens.

When you let it go, it moves it to the Venice Folder and you don't see the Music on the Downloads Folder. I recommed you click on X in the upper right to close the Window, which is next.

When you click on the X, the window closes. If you want to download other Music, you can type in another and follow the same process as I showed you before. When you finished or don't want other Music, I recommend you click on X next to Audio Library YouTube to close the page, which is next.

• It starts loading video. Next is when it is finished.

 When it is finished, you see Download. Next is what happens when you click on Download.

 A new window opens again as I showed you before and because I clicked on the Save File box before, it shows it. Then click on OK in the lower right again and next is what happens again.

 The window closes again and it downloads the music to your Computer. I recommend you click on the Download icon again in the upper right, like
 I did and you see the Music Completed. I also
 recommend the Folder icon right of it again and next is what happens.

 A new window opens called File Explorer again with the Downloads Folder and you see the Music highlighted at the bottom of the Downloads Folder. Next explains what to do again.

- As I mentioned before, because the Music is on the Downloads Folder, it is not easy to find it. That's why I recommend you go to the Music Folder and create a New Folder and then move the Music from the Downloads Folder to the New Folder under the Music Folder. Once you do that, it is easier to find the Music.
- You follow the same process as I showed you before to create a New Folder under the Music Folder and drap the Music from the Downloads Folder to the New Folder under the Music Folder.
- Next is a sample of Created a New Folder and go to the Downloads Folder and start to drag the Music from the Downloads Folder to the New Folder under the Music Folder.

 Here is a sample of Created a New Folder and go to the Downloads Folder and start to drag the Music from the Downloads Folder to the New Folder under the Music Folder. Next explains again.
