## Step 1 - Part 5 – How to Download Free Music with Opera Browser

- If you don't have Music on your computer at home, you can download Free Music on your Computer. You have a lot of options. The first option if you have a gmail, you can go to YouTube and download Free Music. If you don't have gmail, you have to create a Google account to download free music from YouTube. I will first show you a sample of gmail and how to get to YouTube and download Free Music.
- Second option is download Free Music from different Websites. I will show you that later.
- Third option is download Music using aTube Catcher, but there may be copyright issue. I will show you that on the Step 3.
- As I mentioned before in my Why I download Music on my Computer PDF file, Movie Maker has 3 links to websites called AudioMicro, Free Music Archive, Vimeo, but most of them you have to create an account, except Free Mustic Archive. Next is a sample of gmail account.

- If you have Gmail, you click on the in the upper right and you see a list and click on YouTube.
- Next is what happens.

 A new Page open with YouTube and you click on you account icon in the upper right, like I did and then click on YouTube Studio.

#### • Next is what happens.

OD Camina

It then starts to change the page. When finished the page it goes to **Channel Dashboard** page. You then Then you hover over Other features, like I did and you see a list and click on More at the bottom and next is what happens.

A new page opens called **CREATOR STUDIO.** Then click on **CREATE** at the bottom of the left and next is what happens.

 Page changes and you see Audio Library with music with NEW ones. Next explains the Audio Library.

## I tried a Search music for Artists and there were not any, so Audio Library has just clasical music. You then can type in another name, like Christmas or something else. Next is what I type in.

It starts to download the Music on your Computer. When finished, you see in the upper right that the Download complete. I recommend you click on the Folder icon on the right of it next is what happens.

 A new window opens called File Explorer with the Downloads Folder and you see the Music highlighted at the bottom of the Downloads Folder. Next explains what to do.

 Because the Music is on the Downloads Folder, it is not easy to find it. That's why I recommend you go to the Music Folder and create a New Folder and then move the Music from the Downloads Folder to the New Folder under the Music Folder. Once you do that, it is easier to find the Music. Next is how to do it.

#### You first click on the Music Folder on the left and next is what happens.

74 items 1 item selected 6.75 MB

 Window changes to Music Folder. I recommend you click on New Folder and next is what happens.

• You then see New folder highlighted and the type in the name you want and next is a sample.

232 items 1 item selected

 Here is a sample of typing Venice, because of the Music I download. Then click on enter Key and next is what happens.

Page changes to Downloads Folder. You then have to hover over the line on the right, like I did, and then click on it and hold it down and drag it to the bottom next is a sample of dragging it down.

 Here is a sample of dragging it down and you see the Venice\_Beach Music. Sometimes it shows Music Folder on the left. If not, you have to hover the line on the left and drag it down, which is next.

| Venice  | C 75 MD                   |                          |                         |                           |  |     |

 You then see Move to Venice and let it go and next is what happens.

When you let it go, it moves to the Venice Folder and you don't see the Music on the Downloads Folder. I recommed you click on X in the upper right to close the Window, which is next.

 When you click on the X, the window closes. If you want to download other Music, you can type in another and follow the same process as I showed you before. Next explains when your finished.

 Page closes and then click on the URL, like I did and you see it highlighted and then type in Download Free Music and next is a sample.

 Here is a sample of typing Download Free Music and you see a list. I decided to click on download free music and next is what happens.

### Page changes to Google search and you see a list of Websites. I decided to click on MP3Juices, which I recommend. Next is what happens.

#### Page changes to this Website. You see a Search at the top. You then can type in an artist. Next is a sample of typing in an artist.

#### I typed in Michael Buble artist and you see a list. decided to click on the first one and next is what happens.

#### You then see the Michael Buble music under the search. I decided to click on Download at the first one and next is what happens.

#### • It starts loading video. Next is when it is finished.

 When it is finished, you see Download. Next is what happens when you click on Download.

• A new Page opens and it starts to download the Music on your Computer. When finished, you see in the upper right that the Download complete. I recommend you click on the Folder icon on the right of it next is what happens.

 A new window opens called File Explorer again with the Downloads Folder and you see the Music highlighted at the bottom of the Downloads Folder. Next explains what to do again.

- As I mentioned before, because the Music is on the Downloads Folder, it is not easy to find it. That's why I recommend you go to the Music Folder and create a New Folder and then move the Music from the Downloads Folder to the New Folder under the Music Folder. Once you do that, it is easier to find the Music.
- You follow the same process as I showed you before to create a New Folder under the Music Folder and drap the Music from the Downloads Folder to the New Folder under the Music Folder.
- Next is a sample of Created a New Folder and go to the Downloads Folder and start to drag the Music from the Downloads Folder to the New Folder under the Music Folder.

 Here is a sample of Created a New Folder and go to the Downloads Folder and start to drag the Music from the Downloads Folder to the New Folder under the Music Folder. Next explains again.

 When you let it go, it moves to the Michael Boble Folder and you don't see the Music on the Downloads Folder. I recommed you click on X in the upper right to close the Window, which is next.

 When you click on the X, the window closes. I recommend you click on X next to Warning at the Top to close the page and next is a sample.

- Here is a sample of close it. If you want to download other Music, you delete the name and type in another artist and follow the same process as I showed you before.
- This is the end of the Step 1 Part 5.
