

Step 2 - Introduction

- **As I mentioned in my website, if you don't want a Microsoft Account, you can download Games on different Websites with your Browser. Windows 10 has the default Browser called Microsoft Edge. Windows 10 also has the Internet Explorer Browser, but you have to Search for it, which shows you in Part 2. If you don't have other Browsers, I recommend you download 2 other Browsers. I have on-line training for Browsers that show you how to download other Browsers. When you hover over Second Courses, you see Browsers and click on it for my on-line training.**
- **Next explains the Parts under Step 2.**

- **The Parts under Step 2 shows you how to download Games on different Websites with Browsers. The name on the Browsers is on the Parts. Click on the Part with the name of the Browser that you use.**
- **This is the End of the Introduction!**
