

Step 6 - Part B– Crop

- **As I mentioned in Step 6 – Part A, first you make a copy of the photo.**
- **If you haven't watched Step 6 – Part A, do that first.**
- **Next you double click on the original or the copy.**

Then, click on Crop.

You then see a highlighted crop area on the photo

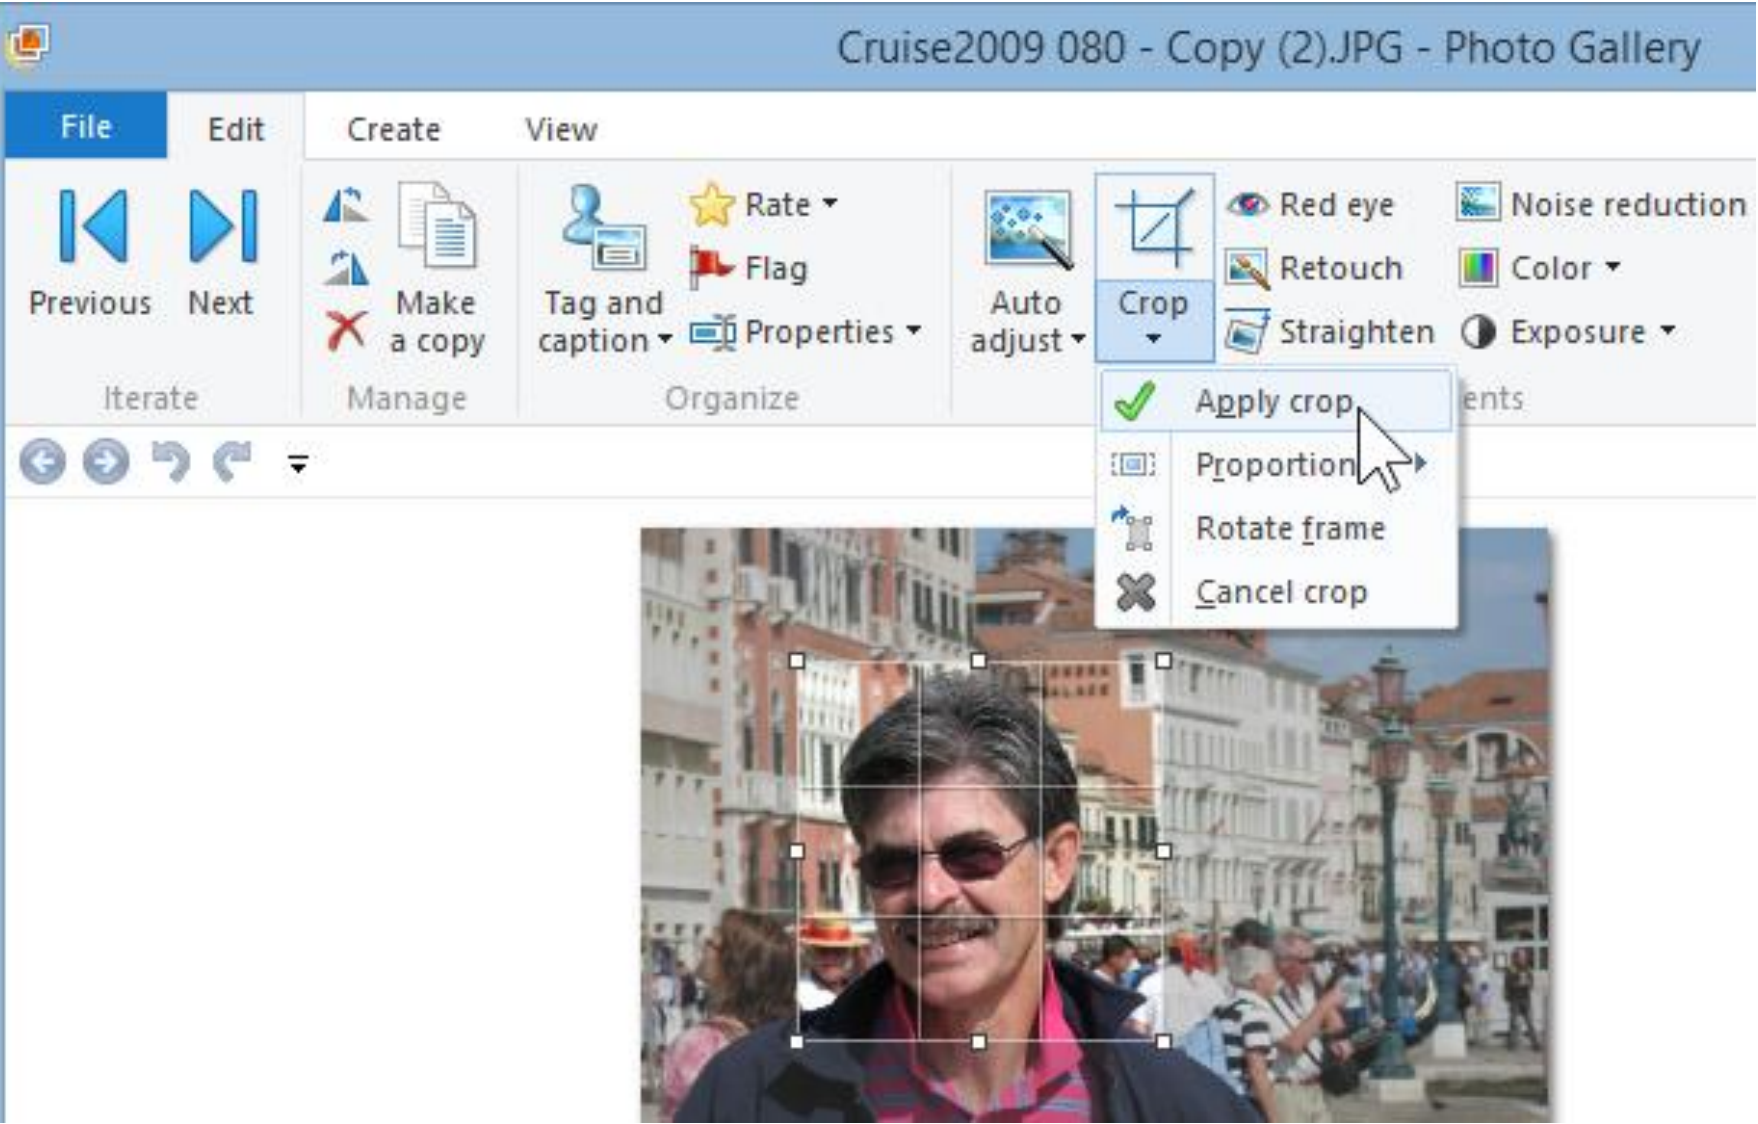

- You can left click and hold it down on the highlight and then move the mouse to drag it around

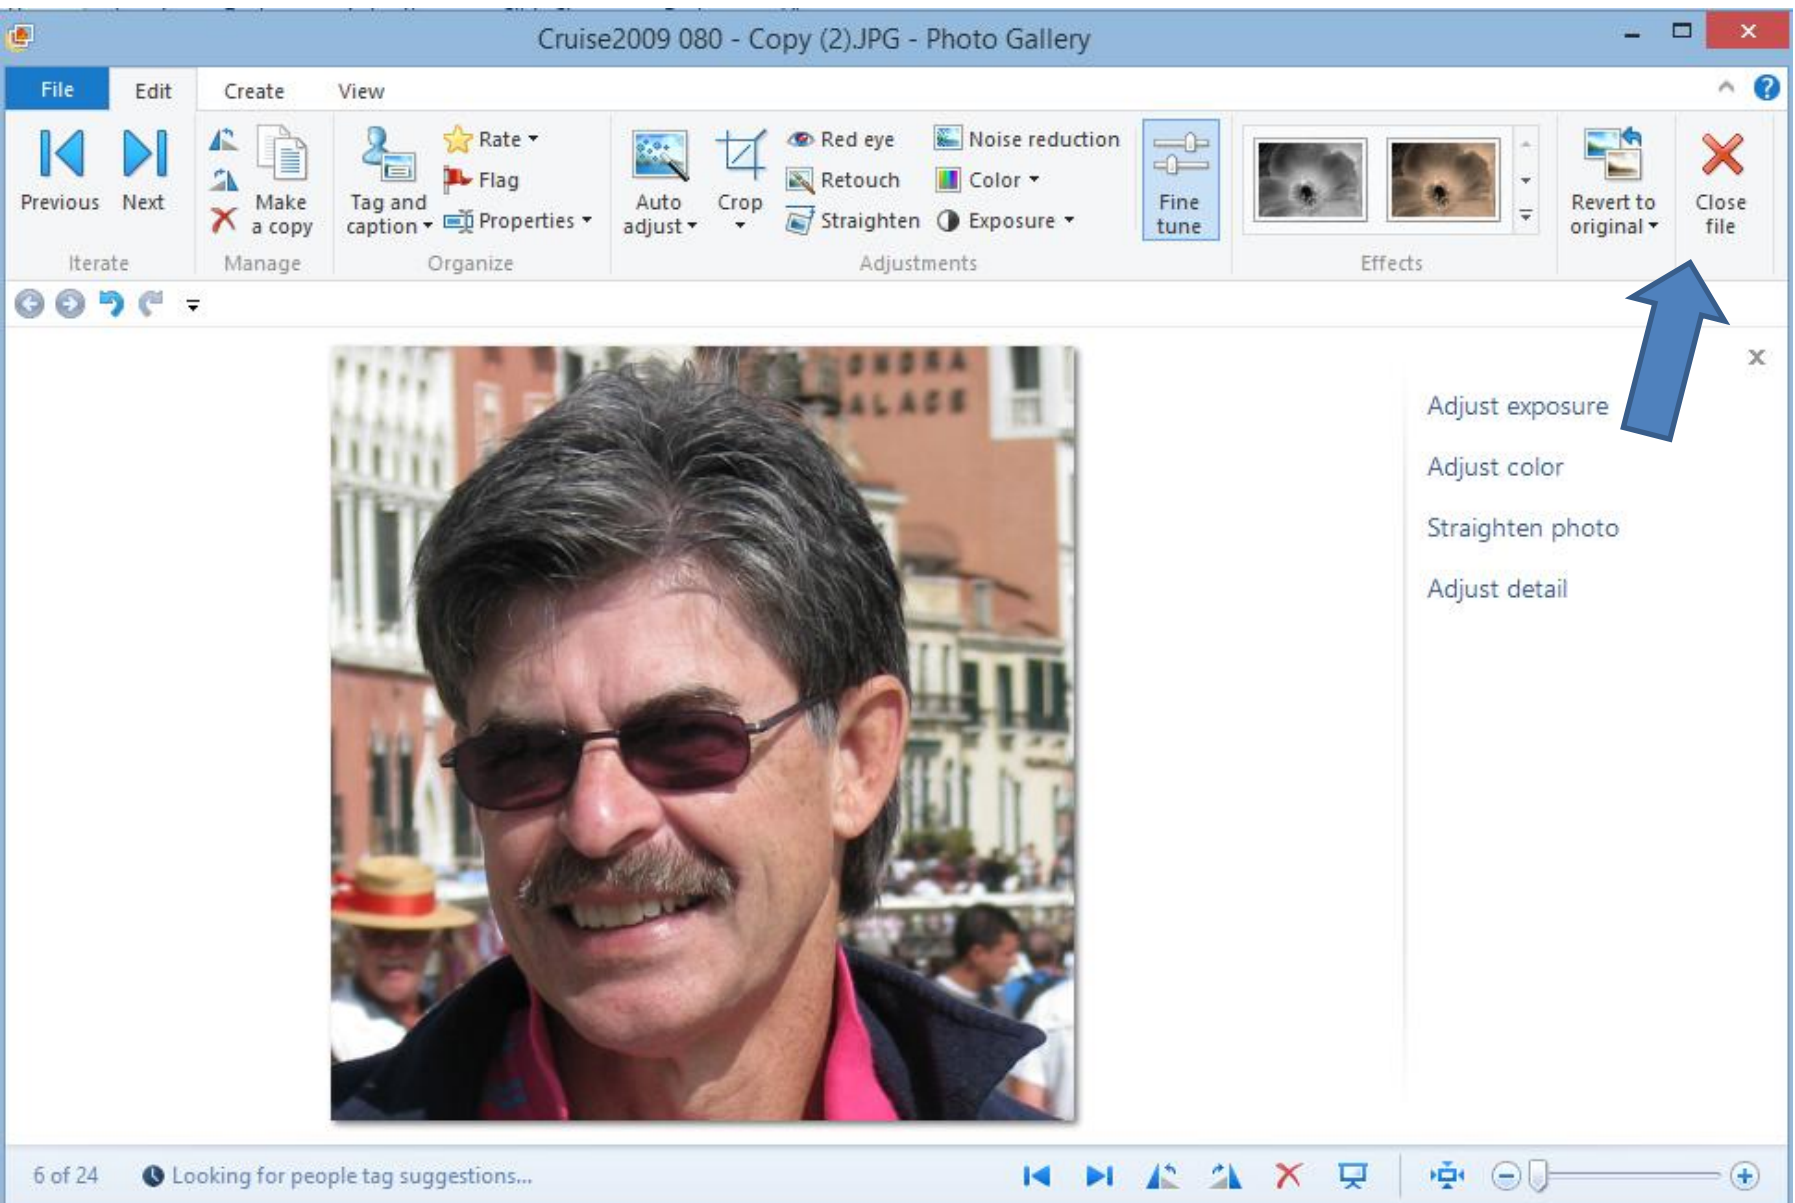

- You then can left click on hold down on any of the box areas and adjust it

- You then click on Crop dropdown and click on Apply crop

- You then see the results, you then click on **Close File** to save it.

End of Part B.
