

# **Step 7 – Part F – Effects.**

- **As I mentioned before, first you make a copy of the photo.**
- **Next you double click on the original or the copy to go to the Edit page.**

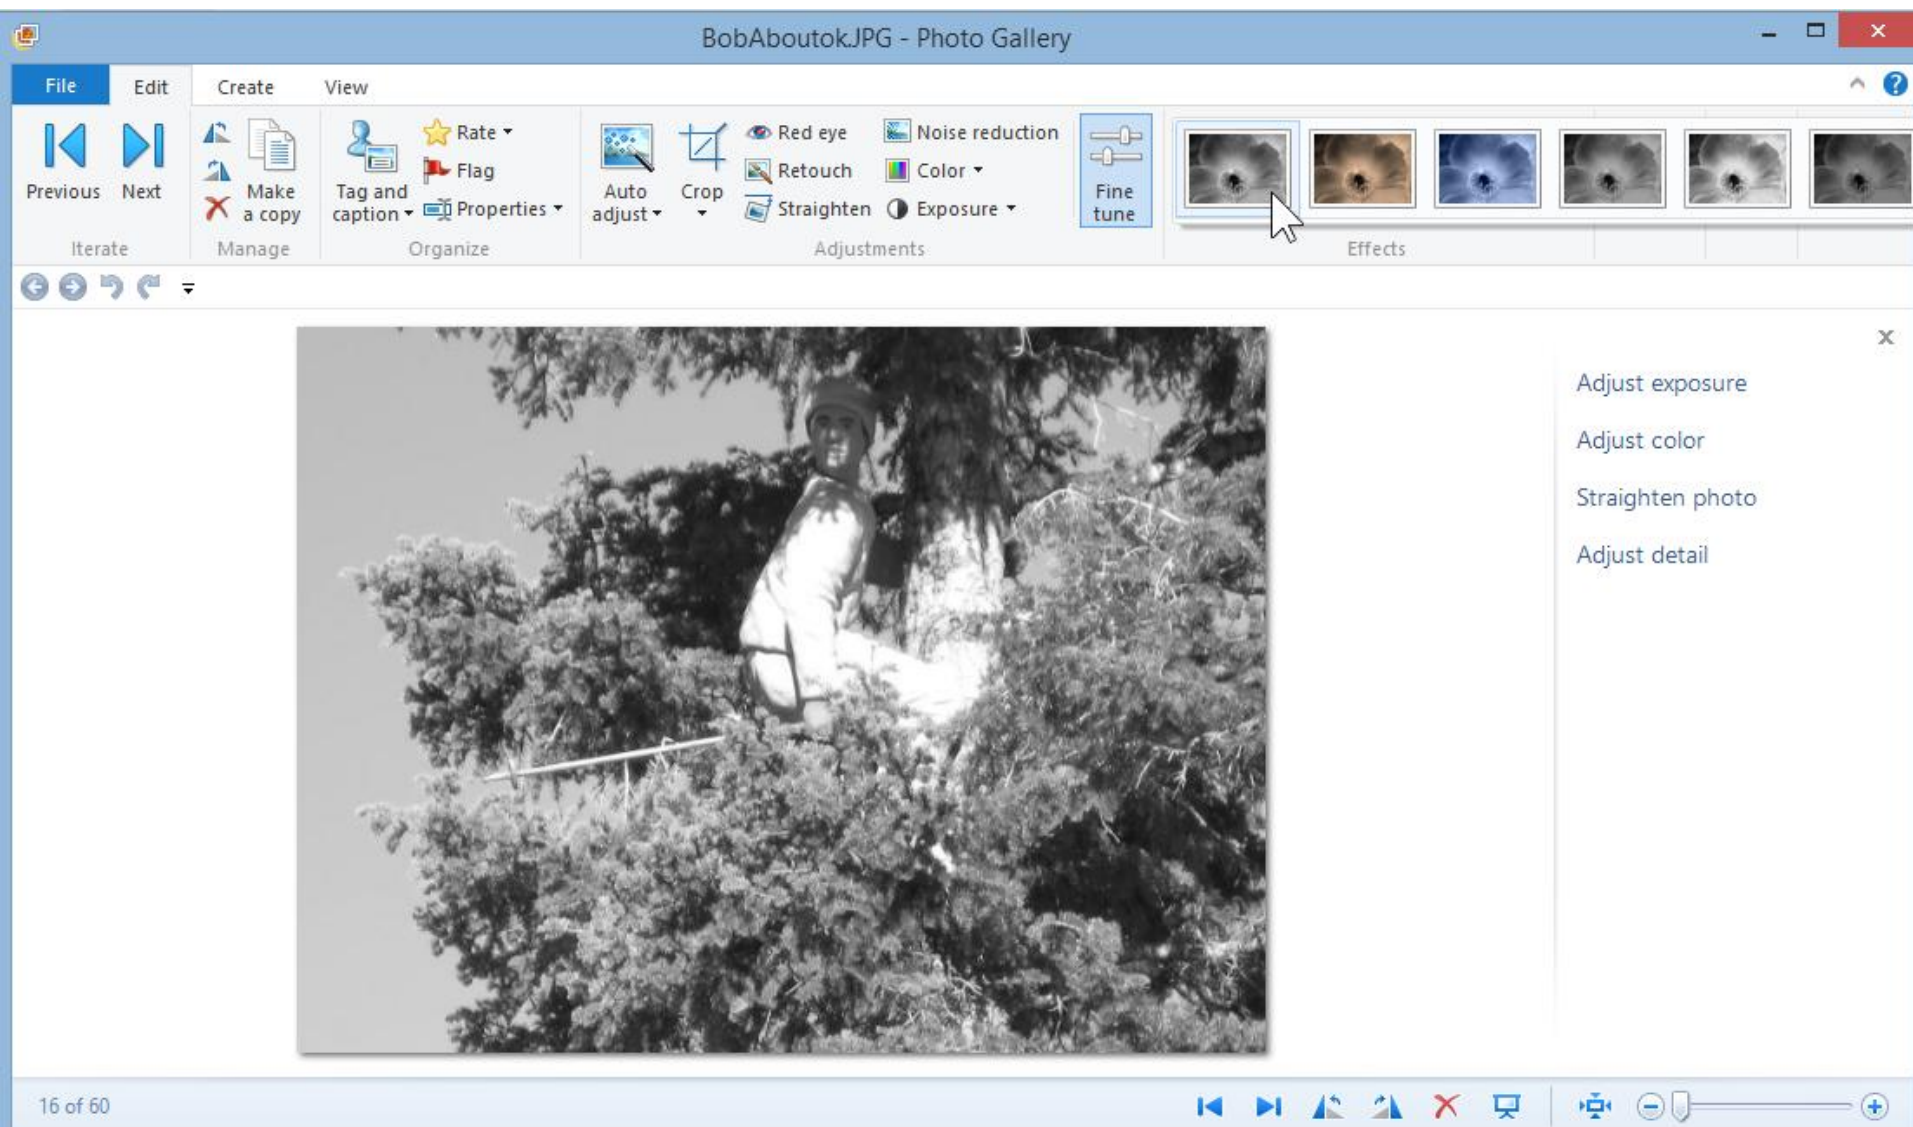

- Then you click on the Dropdown of the Effects to see them all, which is next.

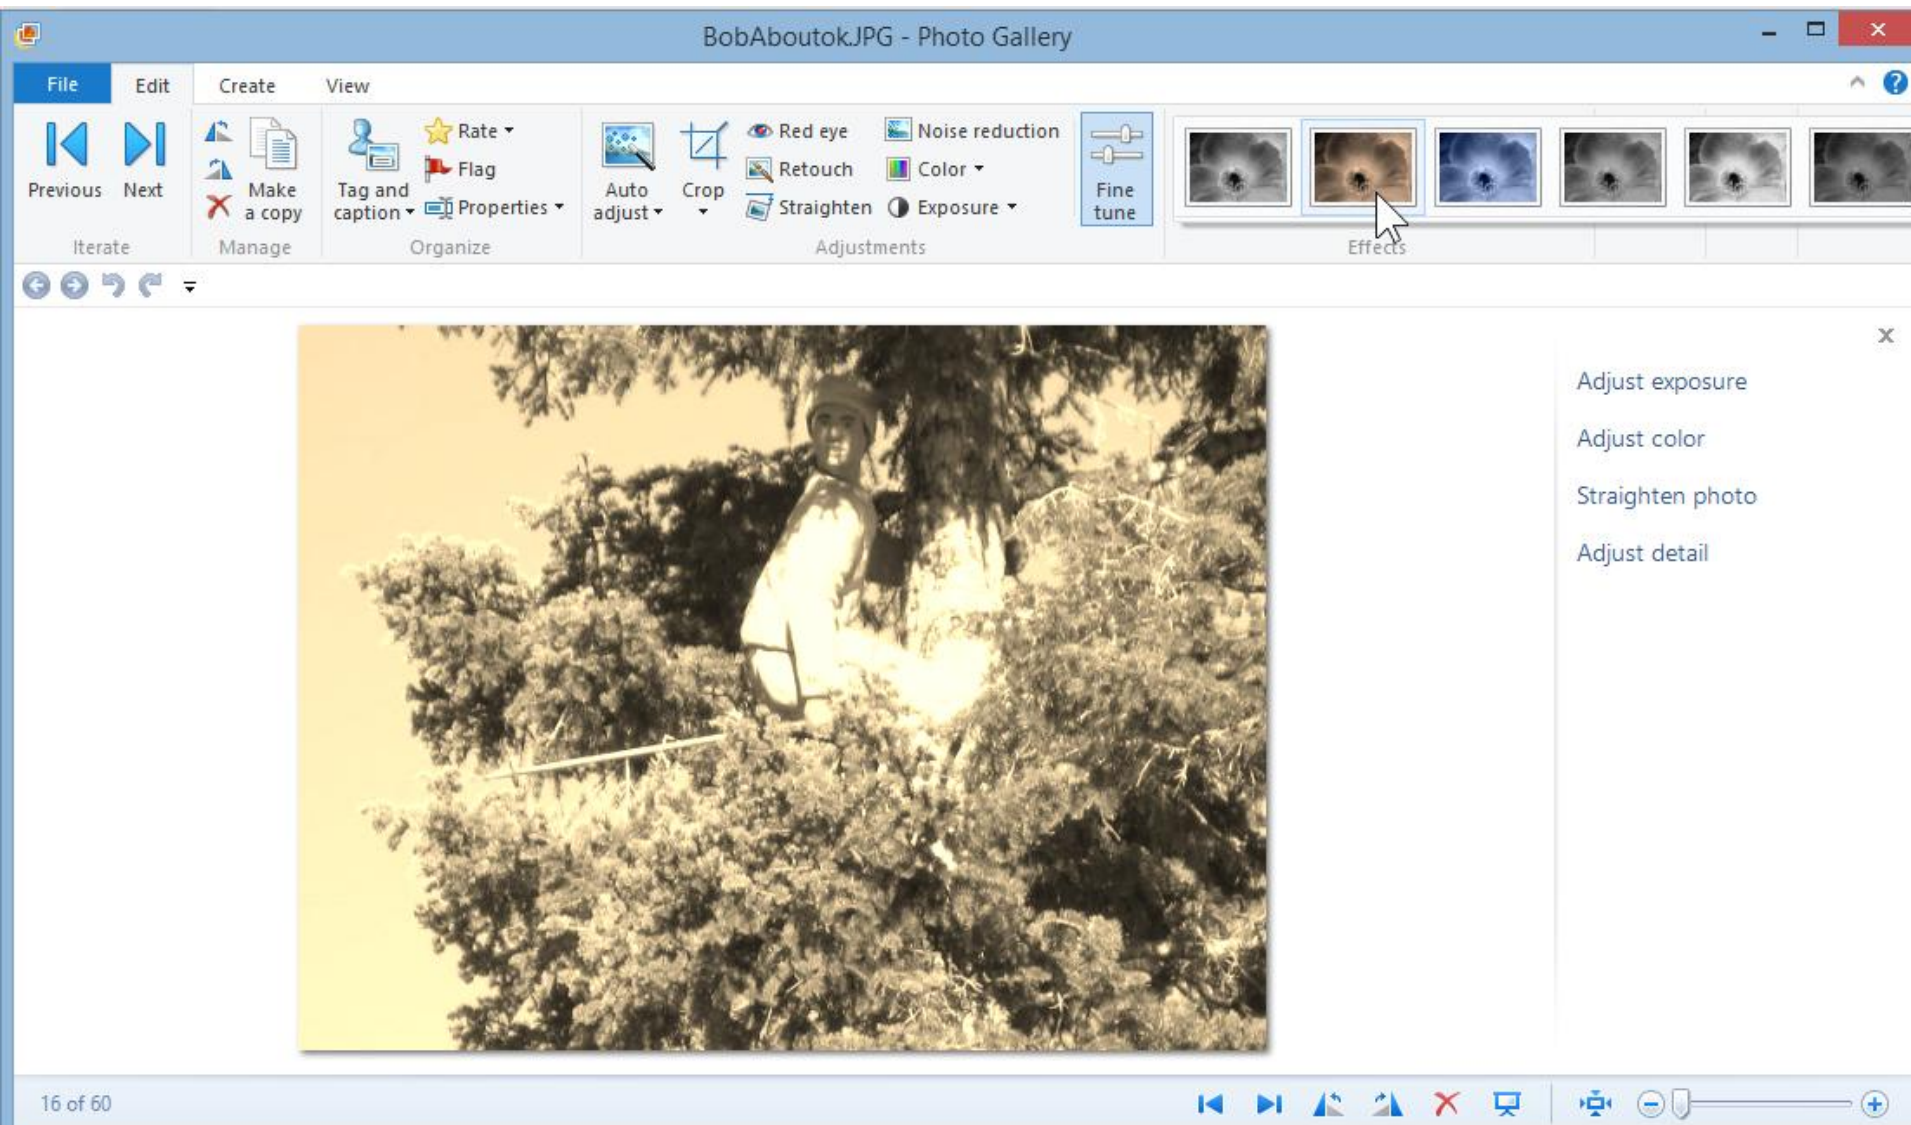

- You then see them all. Next, you hover over the first one, which I will show you next.

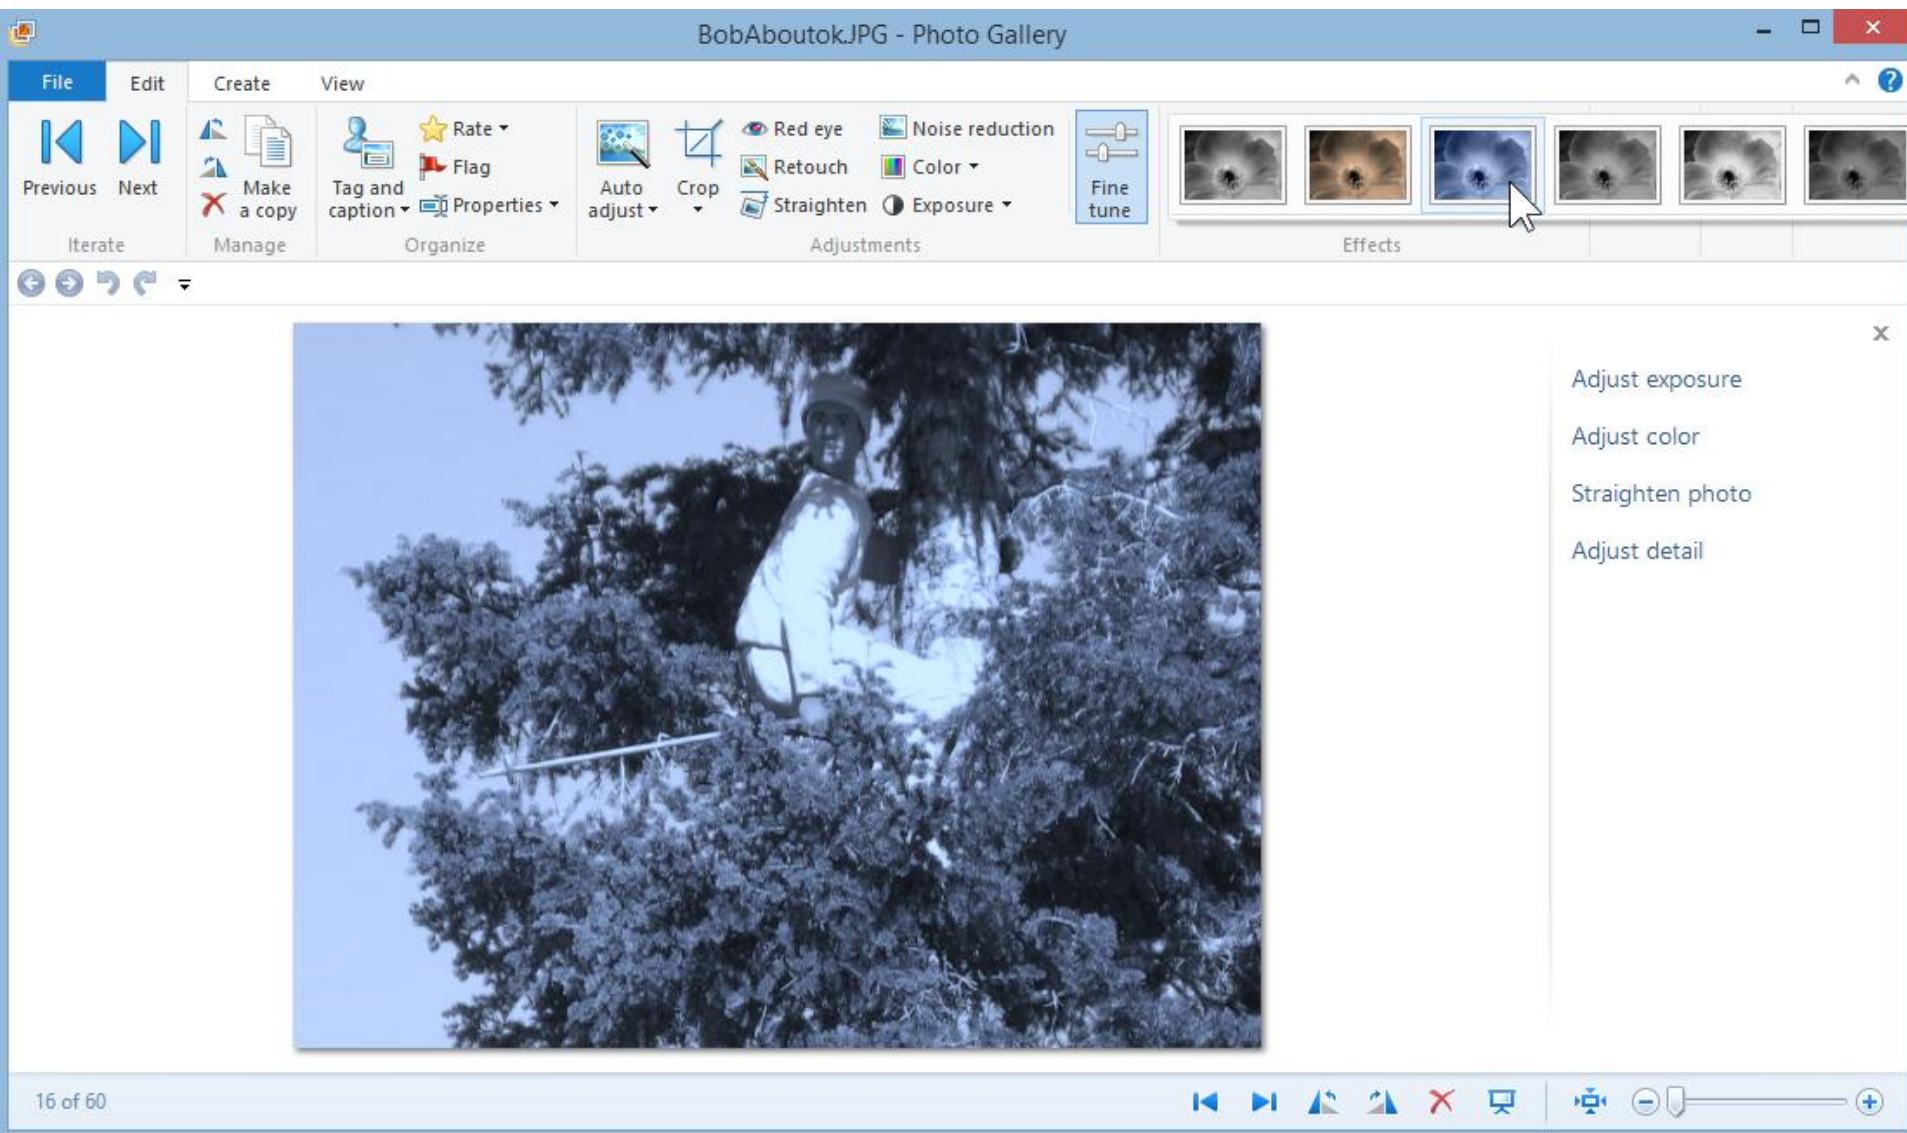

- You then see it Black and White. Then hover over the next one, which is next.

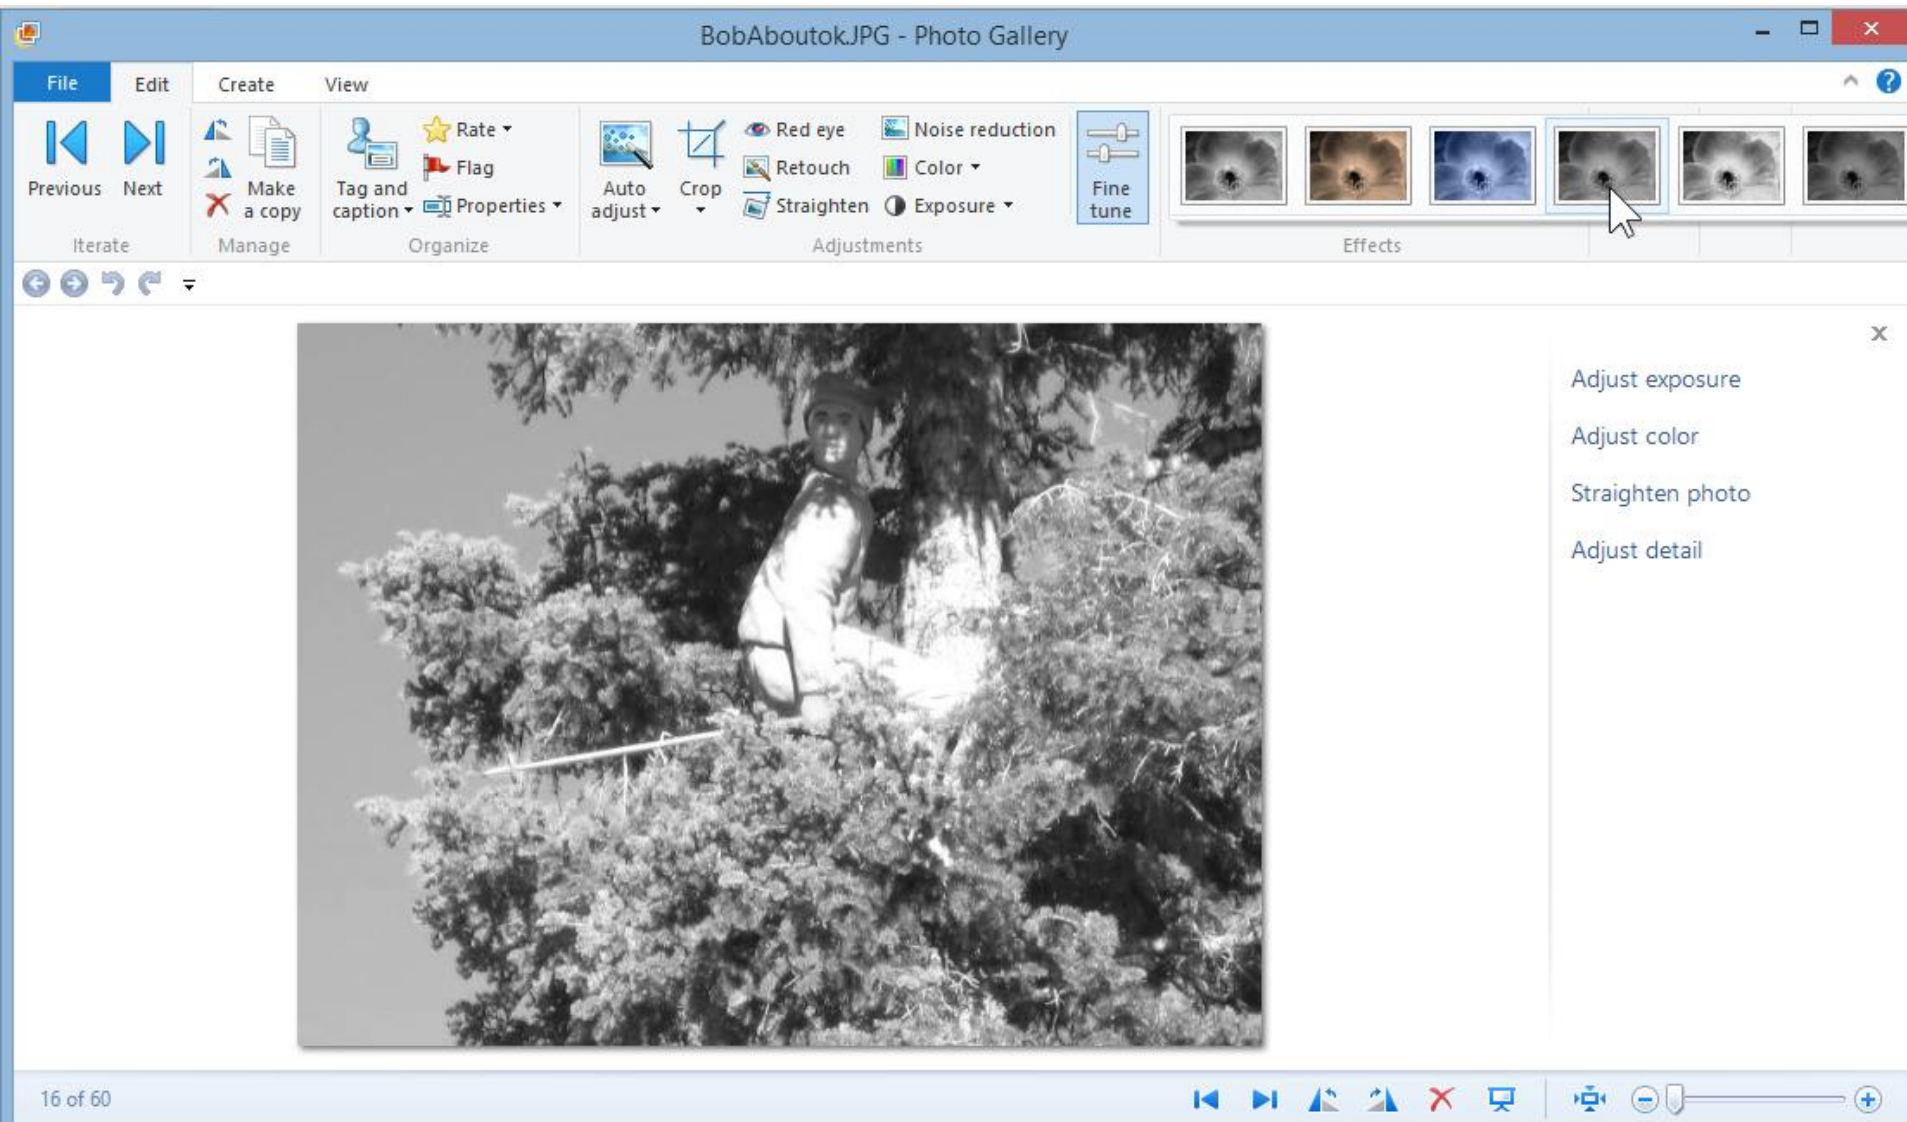

- You then see what is called Sepia tone. Then hover over the next one, which is next.

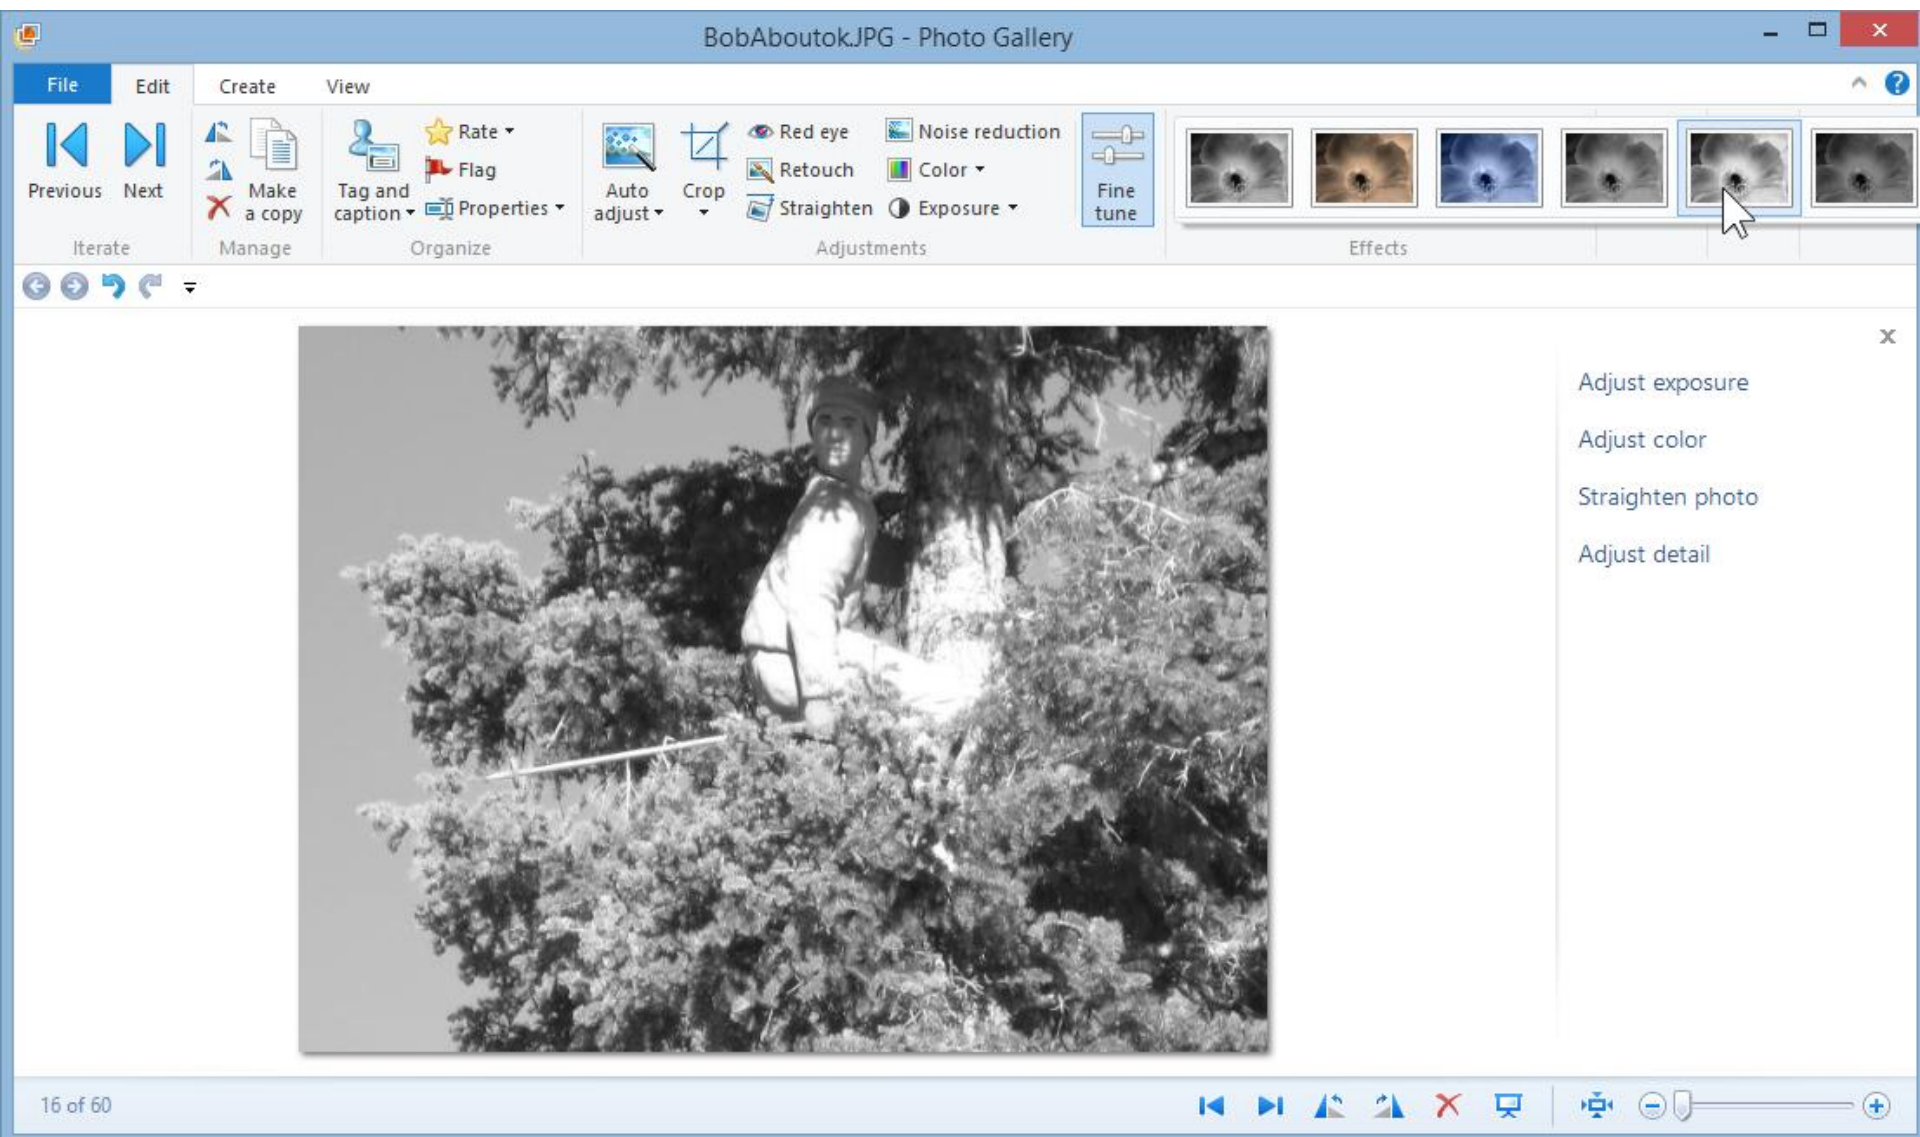

- You then see what is called Cyan tone. Then hover over the next one, which is next.

- You then see what is called Orange filter.
- Then hover over the next one, which is next.

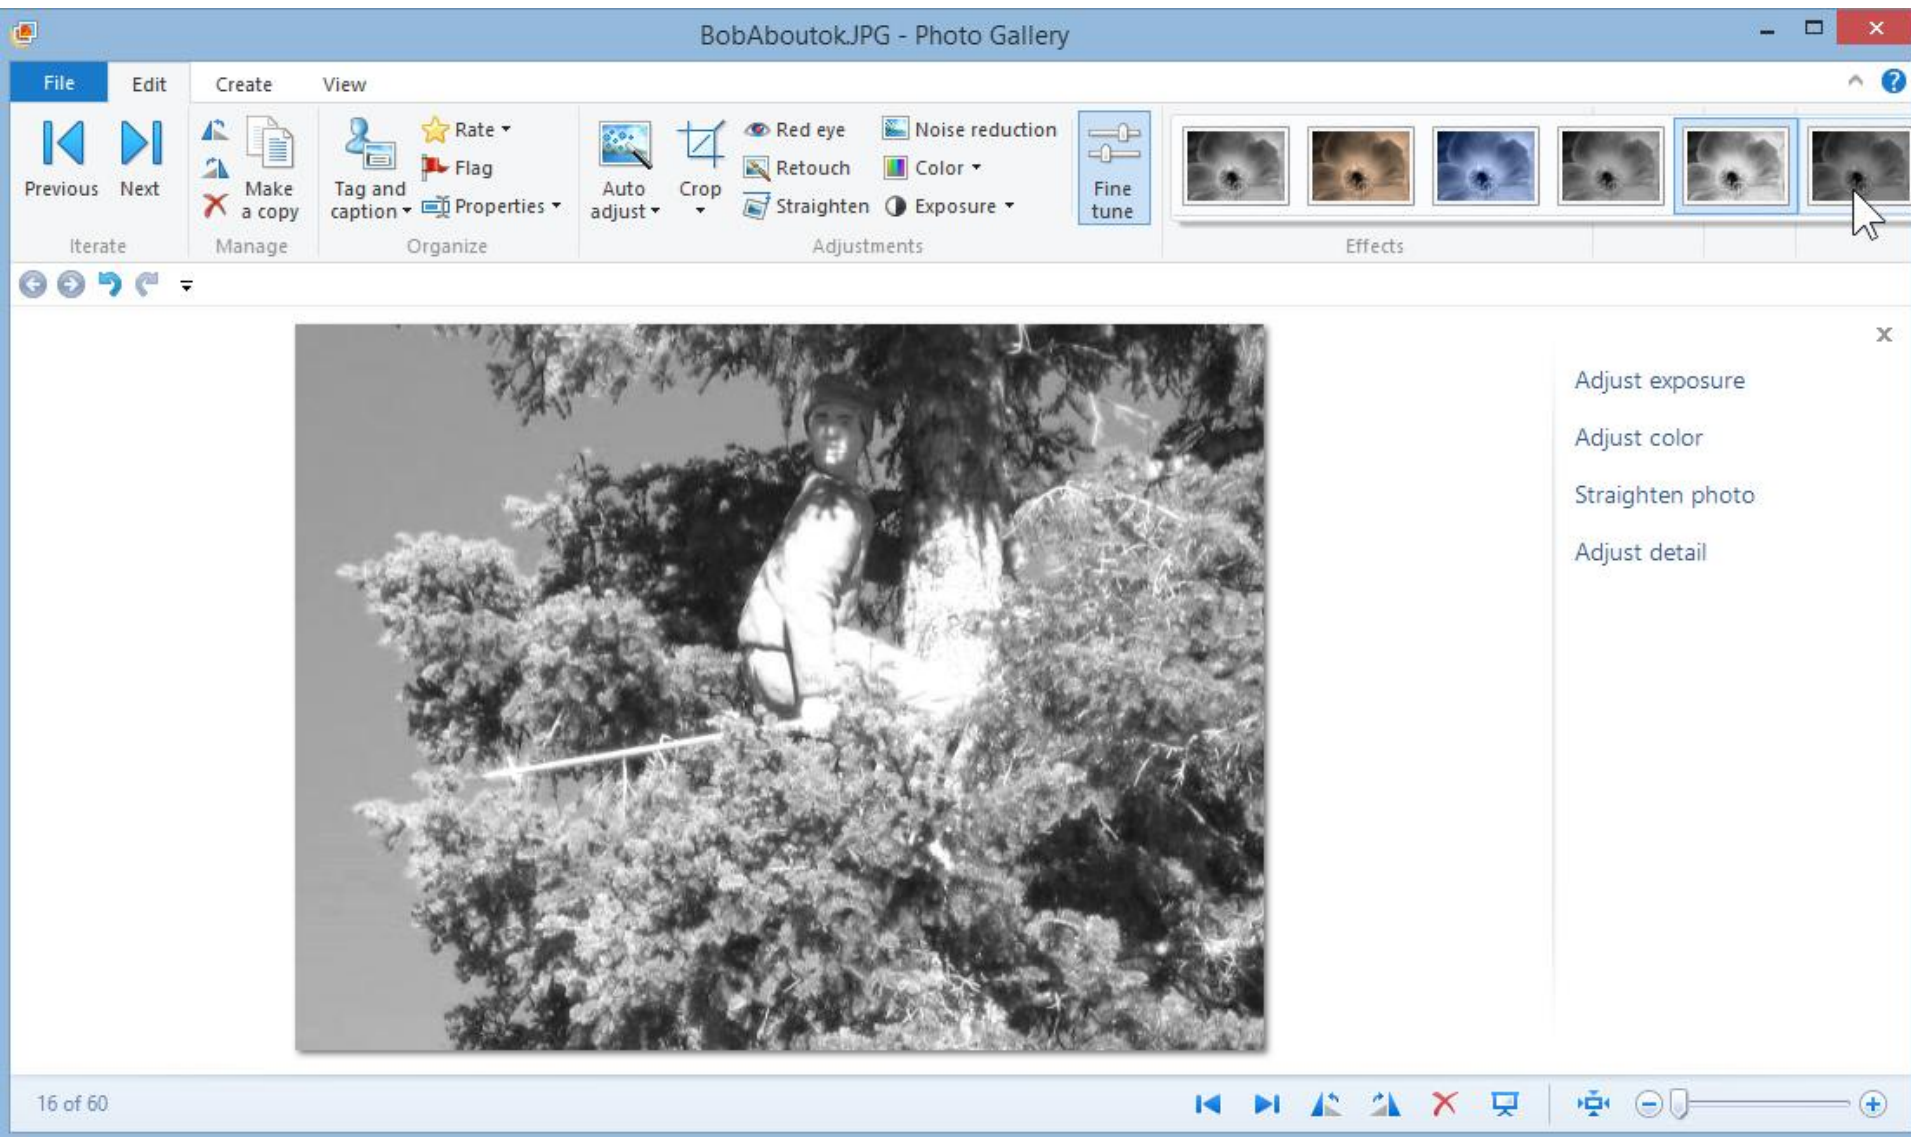

- You then see what is called Yellow filter.
- Then hover over the next one, which is next.

- You then see what is called Red filter. When you find one you like, just click on it like the first one.

- You see Black and White and then click on Close file to save it. This is the end of Part F.
