Tip – How to convert a Video file to a WMV file

- I found that Smilebox does not allow a MP4 Video file. But, it accepts a WMV Video file
- So, I decided to convert the MP4 Video file to a WMV Video file using a free program called aTube Catcher that has a lot of features.
- Next is a link to a website to download it. After that I will show you how to convert a Video file.

- Download aTube Catcher from this site <u>http://www.atube.me/video/download.html</u>
- Once you download it, you will see this icon on your desktop. Double click on it to open it.
- Next is what happens when you open it.

When you open it, you click on Video Converter and next is what happens.

Ready!

Page changes and you click on Add and next is what happens.

• A new window opens and you click on Open Folder and next is what happens.

 File Explorer opens and when you hover over a Video, it shows WMV File. You can then add it to Smilebox as I did in Part 4. This is the End of the Tip.
