

# **Tip – How to Extract Music from Video**

- **Why?**
  - If you have music on your video and want to add the music to Pictures vs. the video on Photos App, that's why to Extract Music from Video.
  - The program is aTube Catcher.
- I showed you before how to download aTube Catcher in Step 3. If you have aTube Catcher, open it and go to the 4<sup>th</sup> page in this PDF file.
- If you don't have aTube Catcher, go to the next page to download.

# aTube Catcher Download.

- Download aTube Catcher from this site <http://www.atube.me/video/download.html>
- Once you download it, you will see this icon on your desktop.

- Double click on it, to open it.
- Next is what happens.

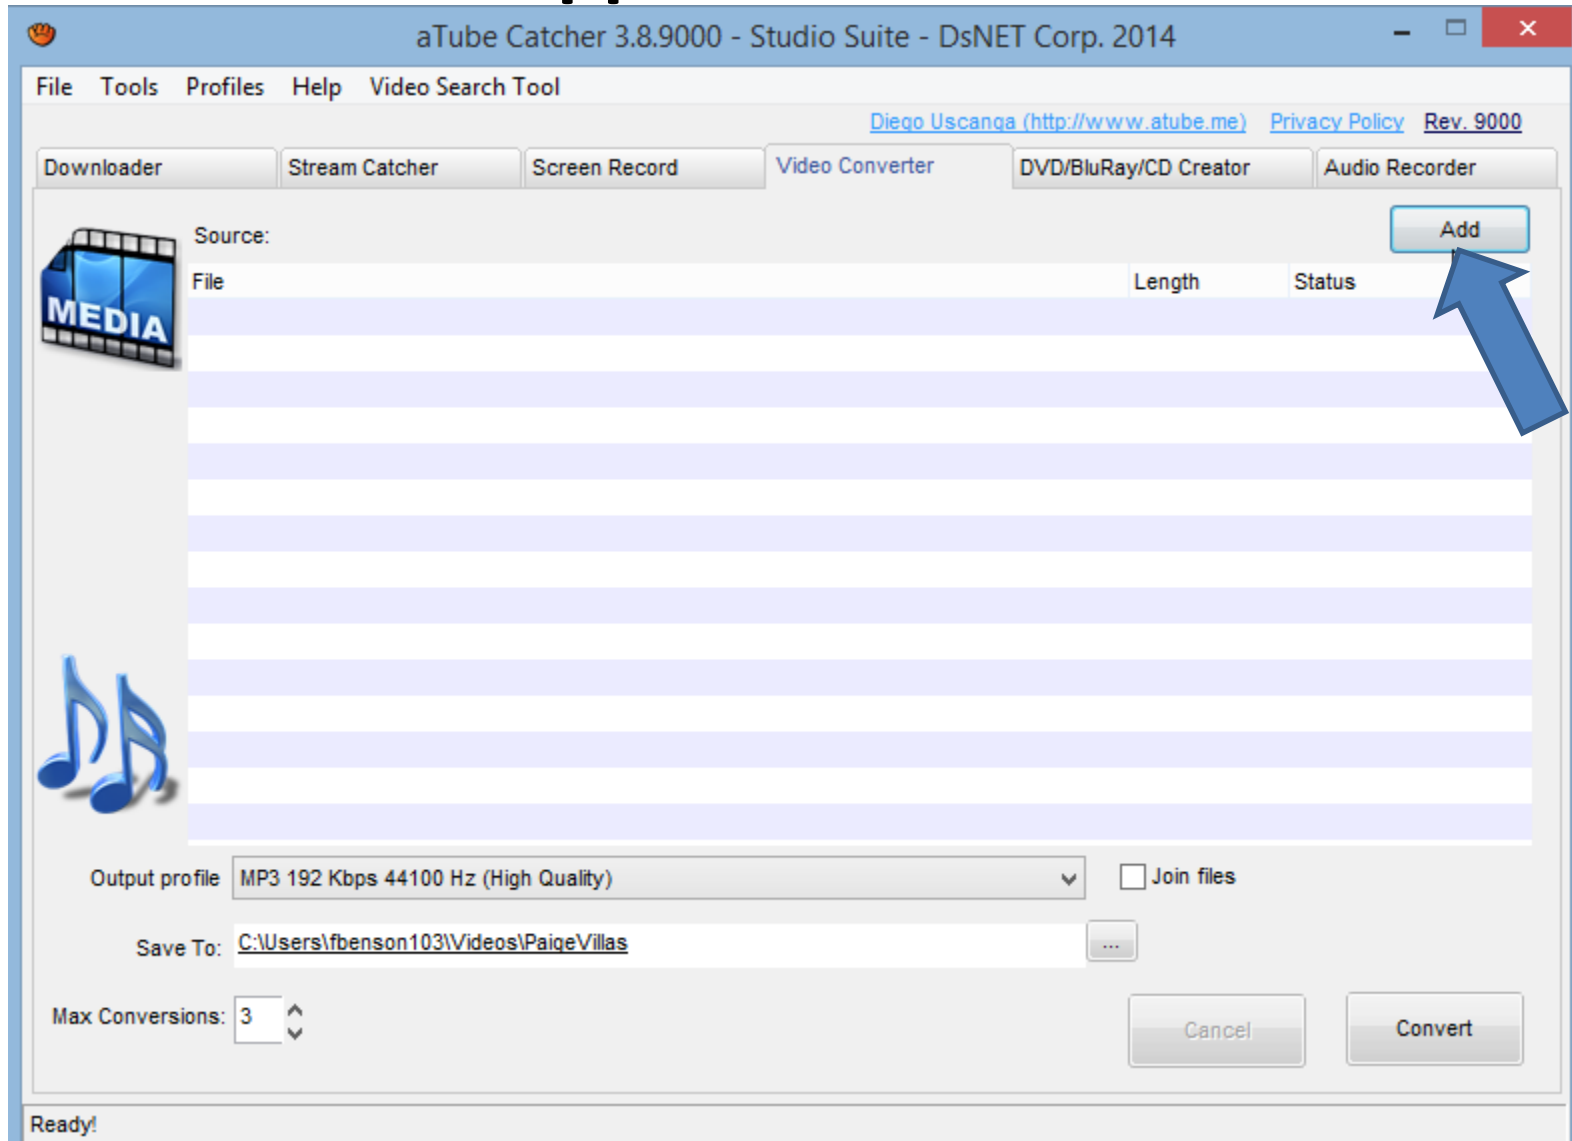

- You see it open with the features. Next is **Convert Videos to mp3**.

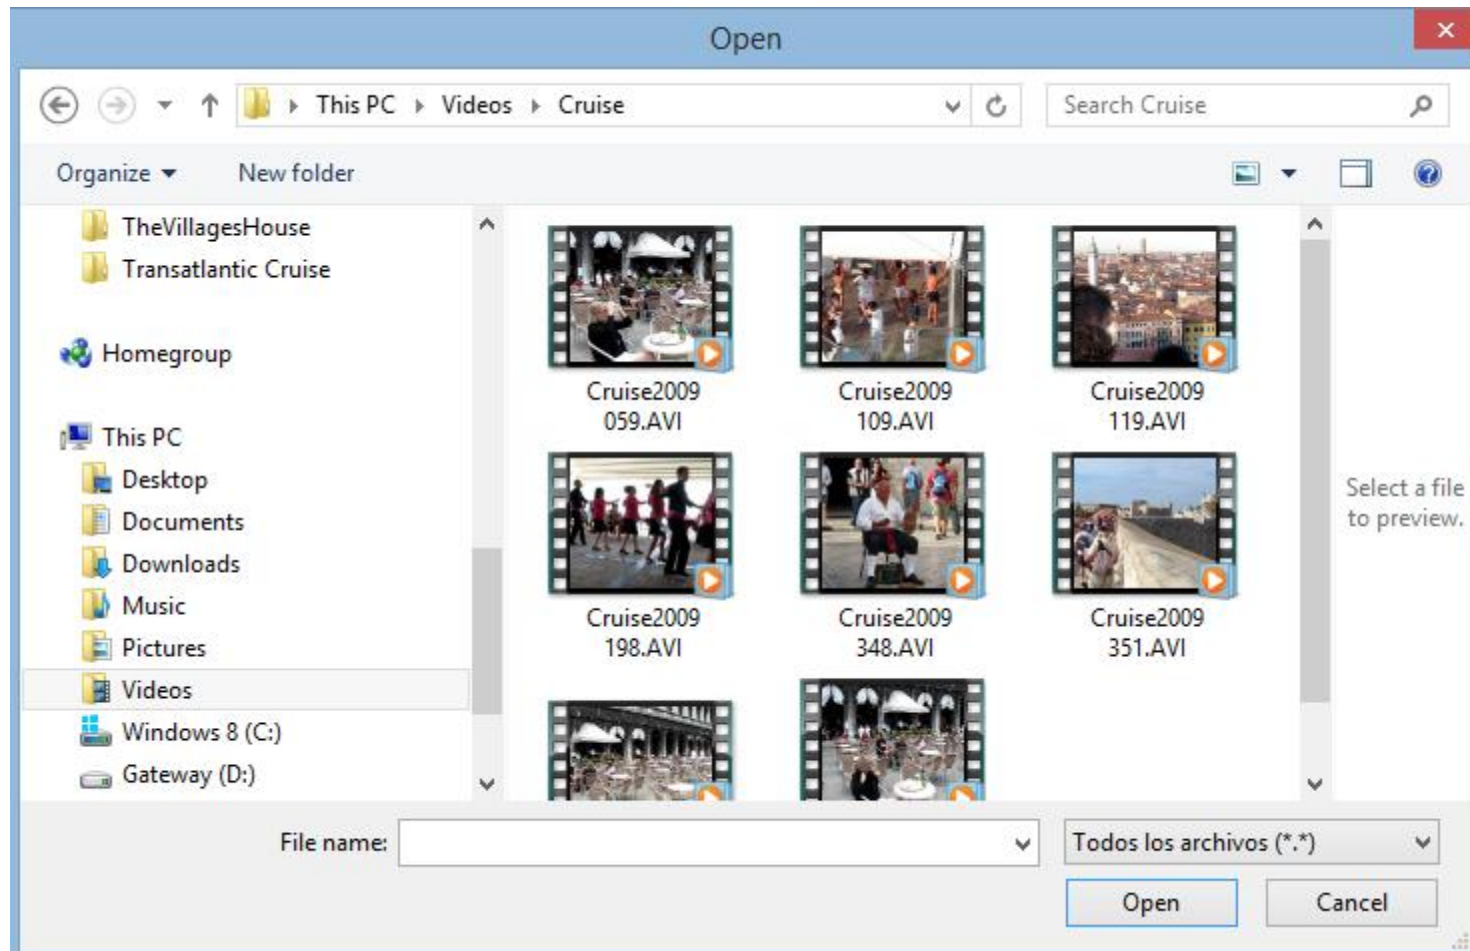

- Click on **Convert videos to mp3** and next is what happens.

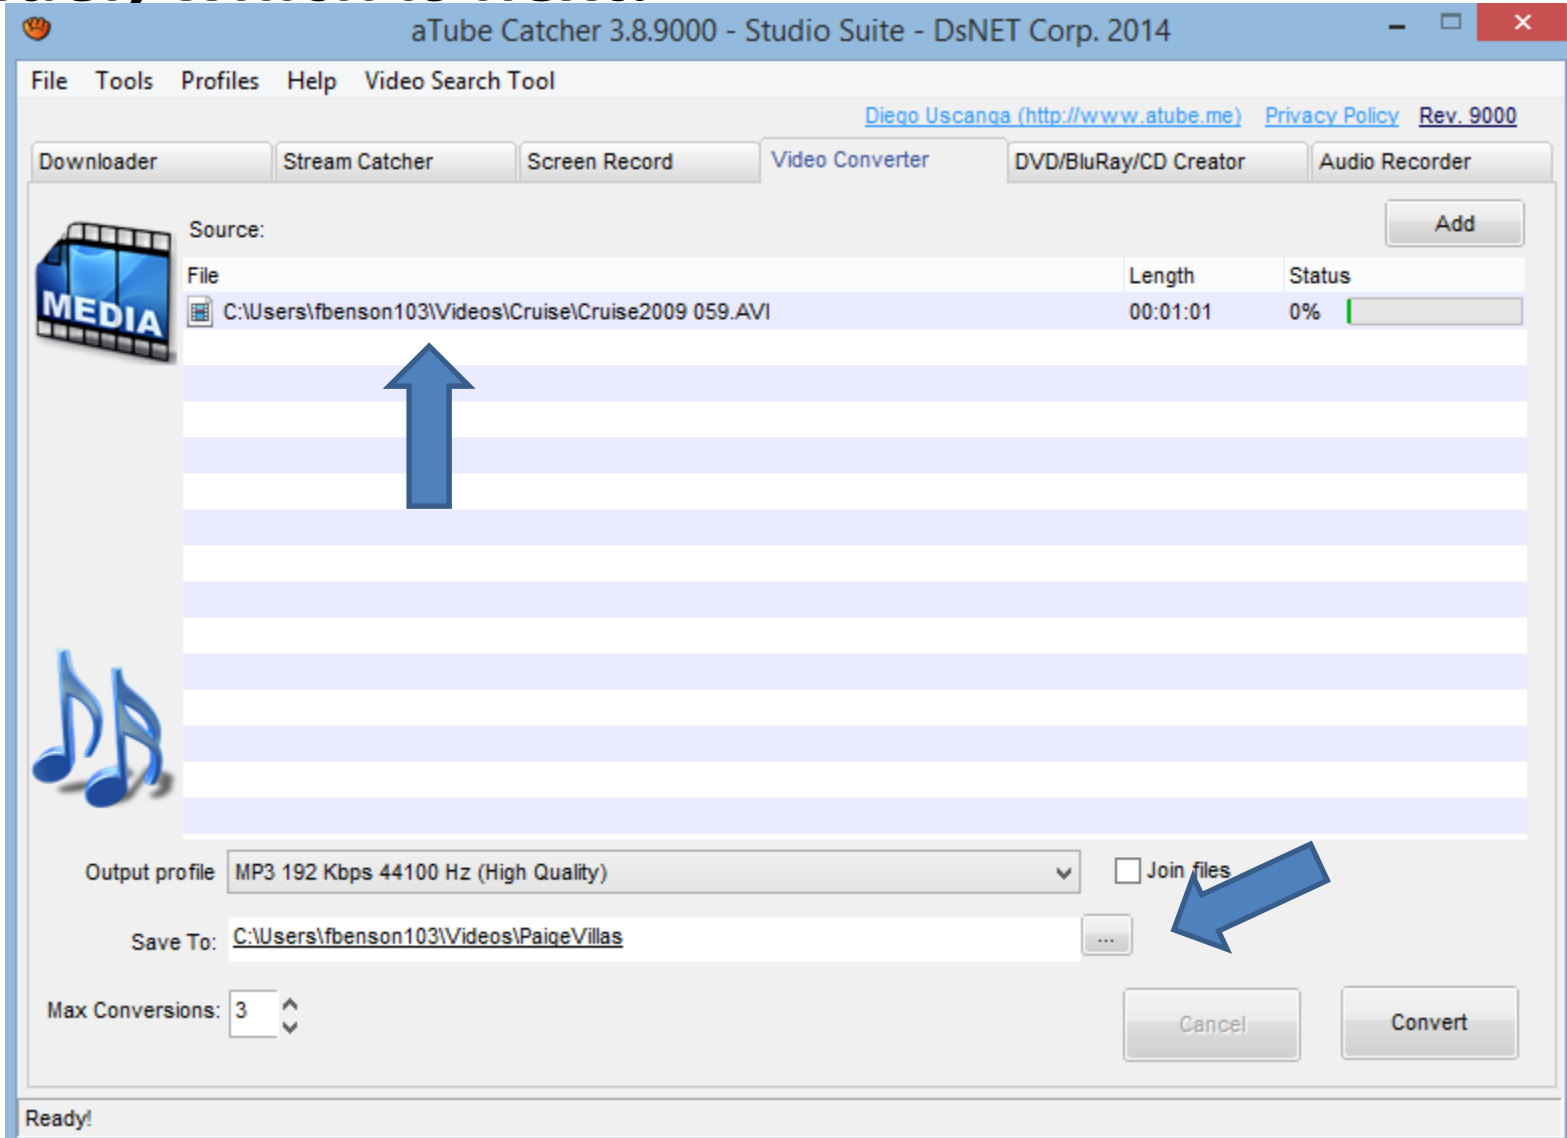

- **New window opens and click on Add and next is what happens.**

- **File Explorer opens. Find the video and double click on it or click on it and click on Open. Next is what happens.**

- You then see it and then click on the icon  on the right of Save To. The reason is to change the folder, which is next.

- **If you had added folders in Step 2, you may want to change the folder in aTube Catcher to the Photos App Folder under the Music Folder as I showed you before in Step 3.**
- **The other option is find another folder or add a New folder.**
- **Next is what happens when you click on the Icon right of Save To as I showed you in other Steps.**

- **New window opens and find the folder or Make New Folder. Next is a sample again.**

The screenshot shows the aTube Catcher 3.8.9152 interface. At the top, the title bar reads "aTube Catcher 3.8.9152 - Studio Suite - DsNET Corp. 2017". Below it is a menu bar with "File", "Tools", "Profiles", "Help", and "Video Search Tool". A navigation bar contains tabs for "Downloader", "Stream Catcher", "Screen Record", "Video Converter", "DVD/BluRay/CD Creator", and "Audio Recorder". The main area features a "Source:" field with a file icon and the path "C:\Users\Fred Benson\Do...". Below this is a table with columns "Length" and "Status", showing a single entry with "00:01:02" and "0%". A "Media" icon is on the left, and a "Music" icon is at the bottom left. A "Browse For Folder" dialog box is centered, with the text: "Select a Folder to store your Videos, (filenames will be got from the title, and untitled videos will be saved as 'untitled')". The dialog lists folders: Desktop, Dropbox, OneDrive, Fred Benson (selected), This PC, Libraries, My Passport (F:), Network, and Control Panel. At the bottom of the dialog are "Make New Folder", "OK", and "Cancel" buttons. The main interface has an "Output profile" dropdown set to "WMV (Windows Media Video V1 VBR)", a "Join files" checkbox, a "Save To:" field with the path "C:\Users\Fred Benson\Documents\Photos App\First Video", and a "Max Conversions:" spinner set to "3". "Cancel" and "Convert" buttons are at the bottom right. The status bar at the very bottom says "Ready!".

- Here is a sample and click on OK and next is what happens.
