Tip - How to find and find Internet Browsers on Windows 10 and Pin to Taskbar.

 As I mentioned in the Introduction, I recommend you download Classic Start Menu and Step 1 shows you how to download Classic Start Menu. If you don't have Classic Start Menu, next is find **Internet Explorer with the Search in Windows 10.** If you have Classic Start Menu, I will show you how to find Internet Explorer with the Classic Start Menu in the Page 5 on this PDF file.

You first click on Search in the lower left, as I did and a new window opens like this. You them then start to type in Internet in the Search, which is next.

- When you type in Internet, like Inter, you then see it at the Top.
- You can click on it to open it.
- If you what to use it more, I recommend you Pin to the Taskbar, which is next.

- You right click on it and then click on Pin to taskbar.
- When you click on Pin to taskbar it goes to the end of the taskbar, which I will so you in Page 8 on this PDF file.
- Next is how to find Internet Explorer with Classic Start Menu.
- If you don't have Classic Start Menu, you should forward to Page 8.

When you click on the Classic Start Menu in the lower left, a new window opens and you see Search at the bottom. I zoomed in, so you can see it. You than start to type in Internet Explorer on the Search and next is a sample.

When you start typing Internet Explorer, like inter, a new window opens and you see Internet **Exploer** at the Top. You click on it to open it.

As I mentioned before, if you want to use it more, you can Pin to taskbar, which is next.
