# Tip – How to find the Upgrade Versions

- I will show how to find the Upgrade Versions and it shows prices and features. As I mentioned before, the prices can change. Also the Versions can change.

- First I will show you the features. The reason to do that is if you need features to upgrade for some reason.

- After that is how to Select one Version and pay.

- Next explains more about upgrade.

- I recommend you don't Upgrade until you are almost finished with your website and for some reason you have to upgrade with features that are not on the free one.

- Weebly use to have Starter, Pro, and Business, Versions. Last year they added a Performance Version. This year they don't show the Performance Version and they added a Connect Version.

- Next is how to get to Upgrade Versions.

- **When you Log in before you Edit Site, you see Upgrade next to Edit Site. You then click on it. If you are in Edit Site, next shows it.**

- **If you are in Edit Site, like Build, you see Upgrade before Publish. Sometimes the color is different, like the one below. Click on Upgrade and next is what happens.**

- **Page changes and it changes cost every year. You see the price, but it is different when you pay 2 years. I will show you that latter. Next explains the features on the left.**

- **Here is a sample of hover over the Free Domain and you see the details.**

- **Next is to Scroll Down.**

⭐ **Free Domain** ($19 value)

Give your site credibility with a custom domain. Plans include credit for one year of a standard-priced domain. Renewals start at $19.95/year after the first year. The domain must be registered within 45 days of the plan's purchase.
- **I Scrolled down a little and you see most of the features now are on each one, except Connect Version. Site Search is not on Connect and Starter Versions. Next is to Scroll down to see under Site Search.**
