

Step 10 - Part D – Add your own Voice/Song

- **Sometime a Laptop allows you to do Voice. If you don't have it on your computer, you will need a Headset or Microphone. If not, you have to purchase to do it.**
- **Next is about purchase.**

Headset of Microphone

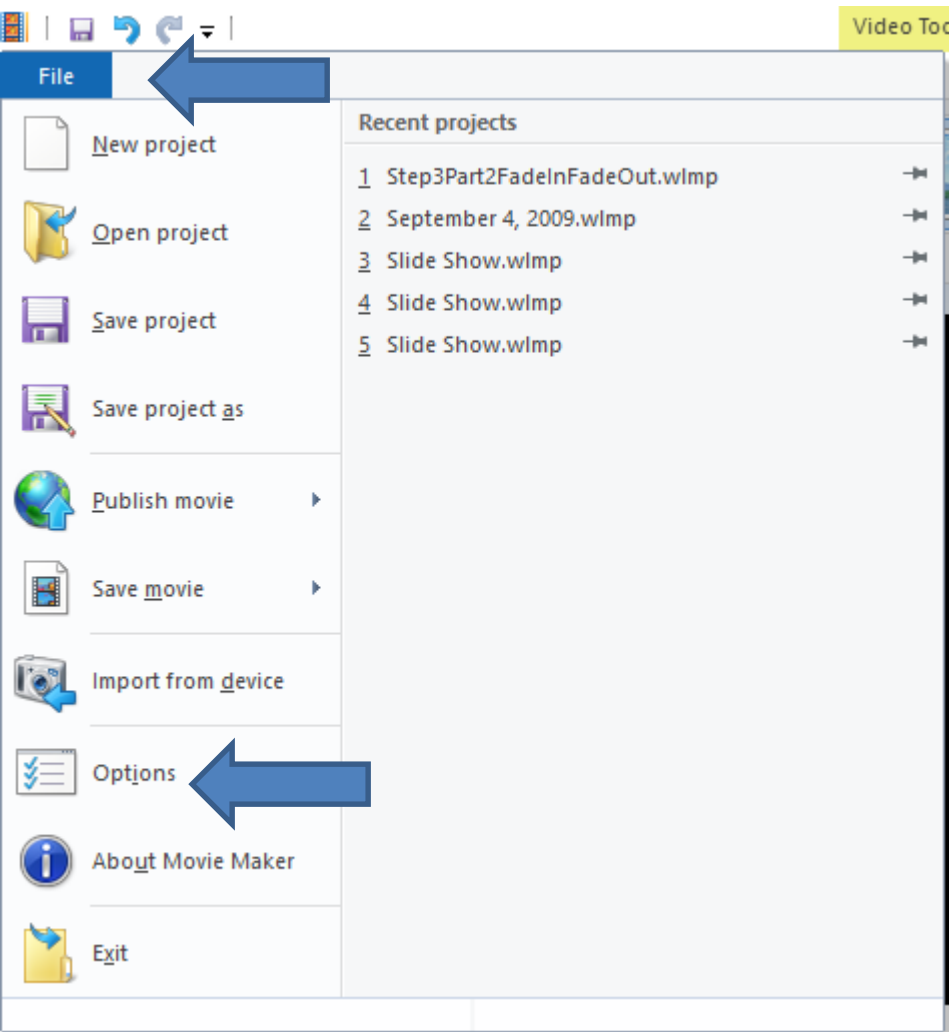

- **If you don't have a Headset or Microphone and you can't record on your computer, you need to purchase one or two of them.**
- **You can purchase a Headset sometimes in Bealls outlet for about \$10**
- **Or, Best Buy between \$20 - \$40**
- **You can purchase the Microphone from ebay about \$19 or Best Buy about \$39.**
- **Next, I will show you how to Plug in Headset and after that is Microphone.**

**Plug in your Headset. Next is
Microphone.**

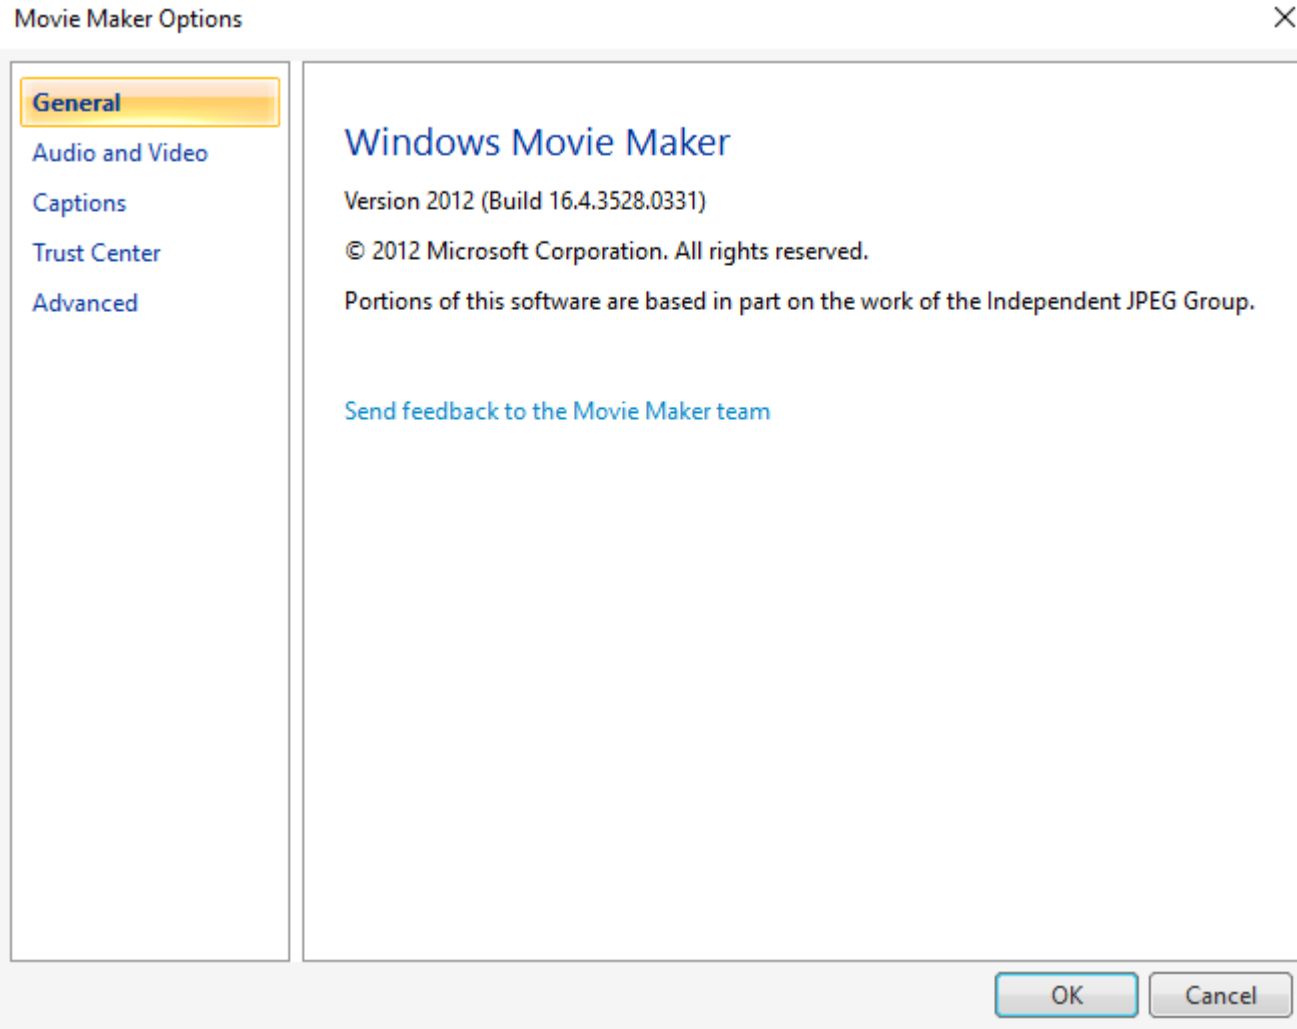

- **Or plug-in Microphone. Next is how to set up which one you are using.**

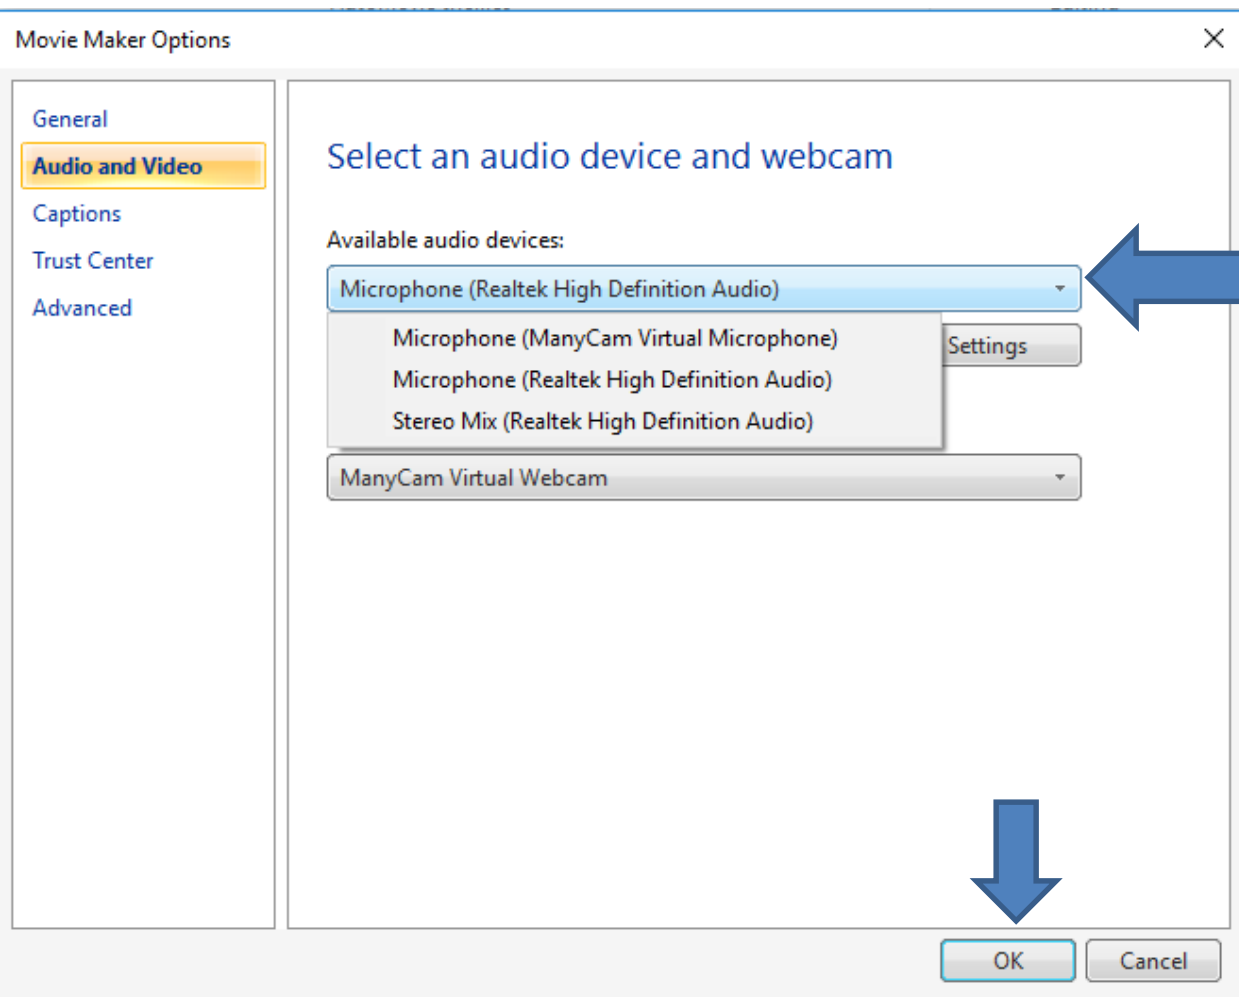

- **Open Movie Maker and click on File in the Upper left. Note – sometimes it is an Icon. When you click on it, you see a list and click on Options.**
- **Next is what happens.**

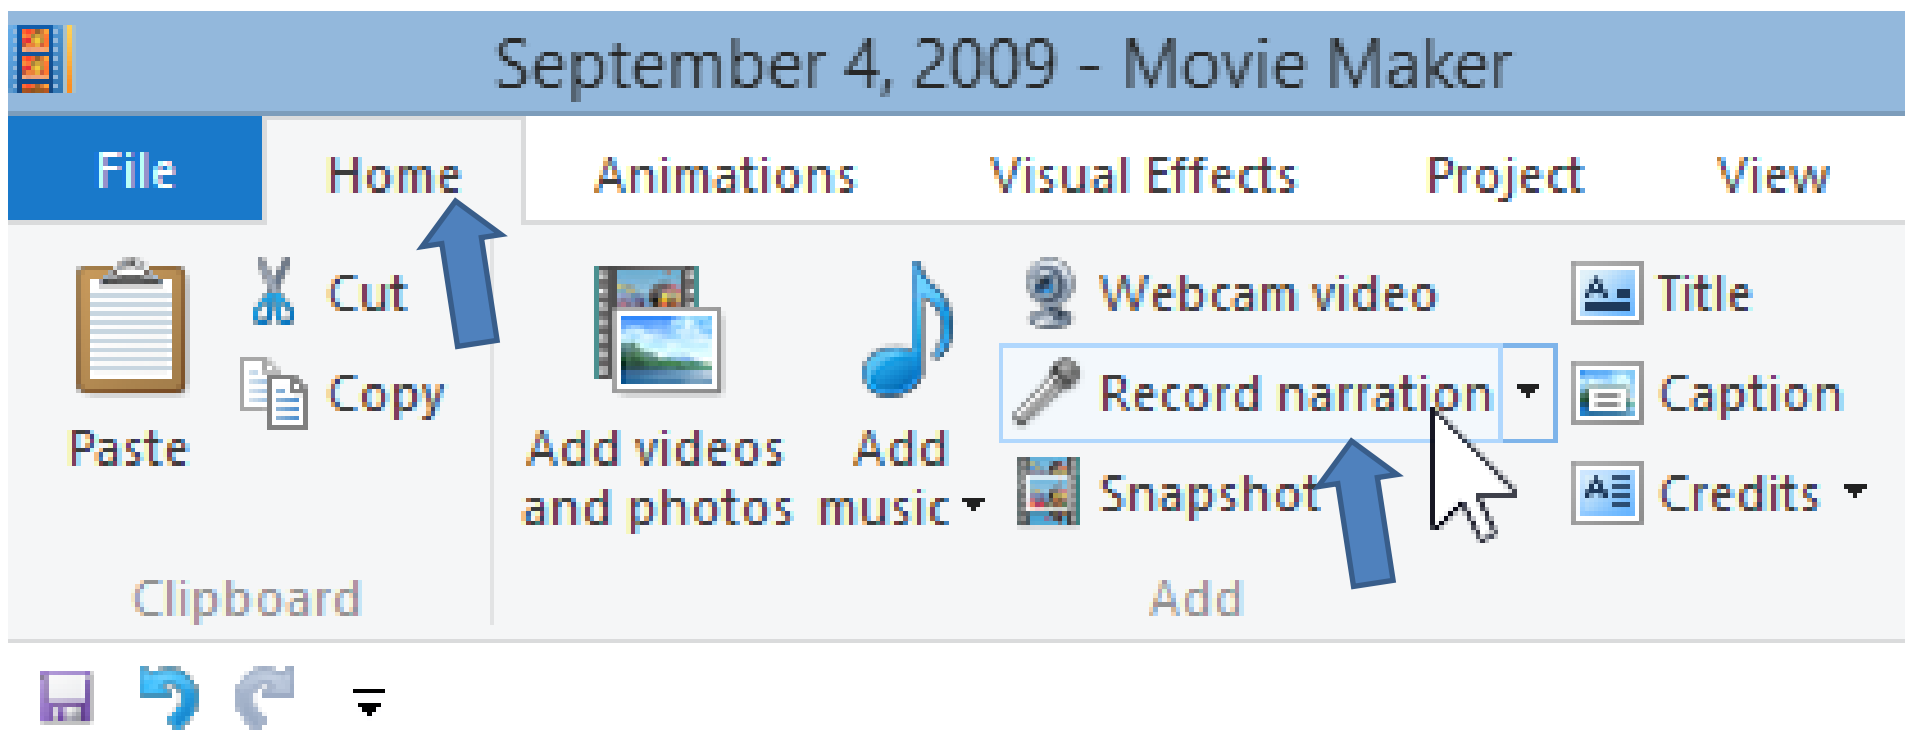

- A new window opens and you click on Audio and Video.
- Next is what happens.

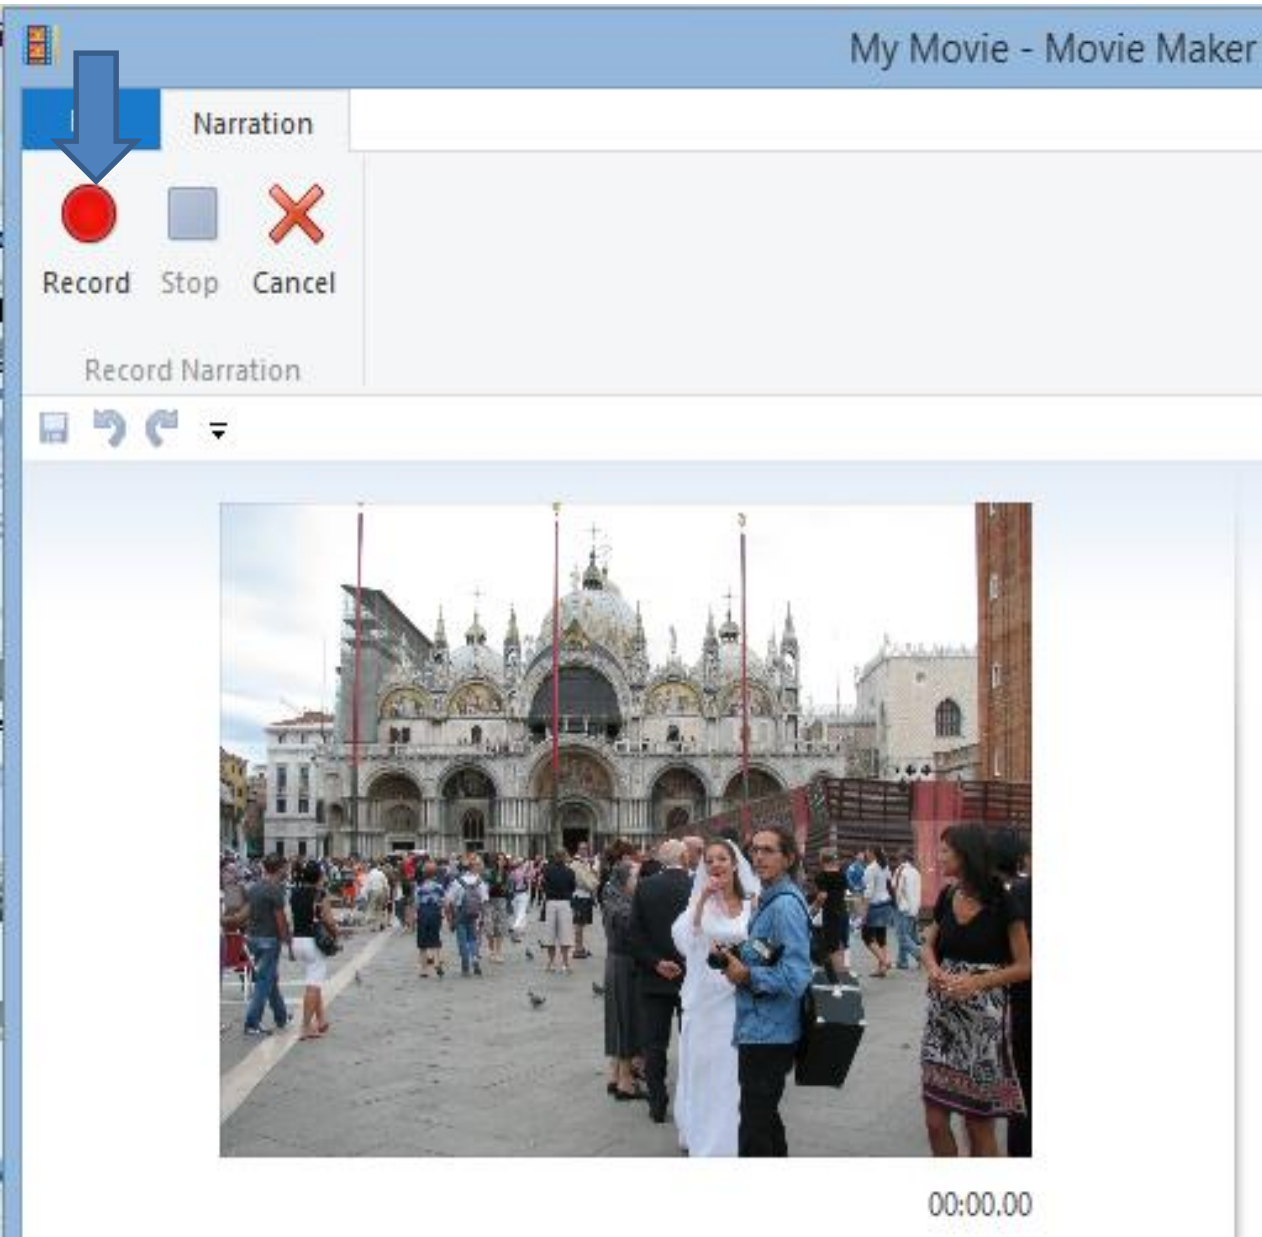

You see Select an audio device and webcam. Then click on the dropdown and you see a list depending on what you have. Click on the one you will use. Then click on OK. Next is what happens.

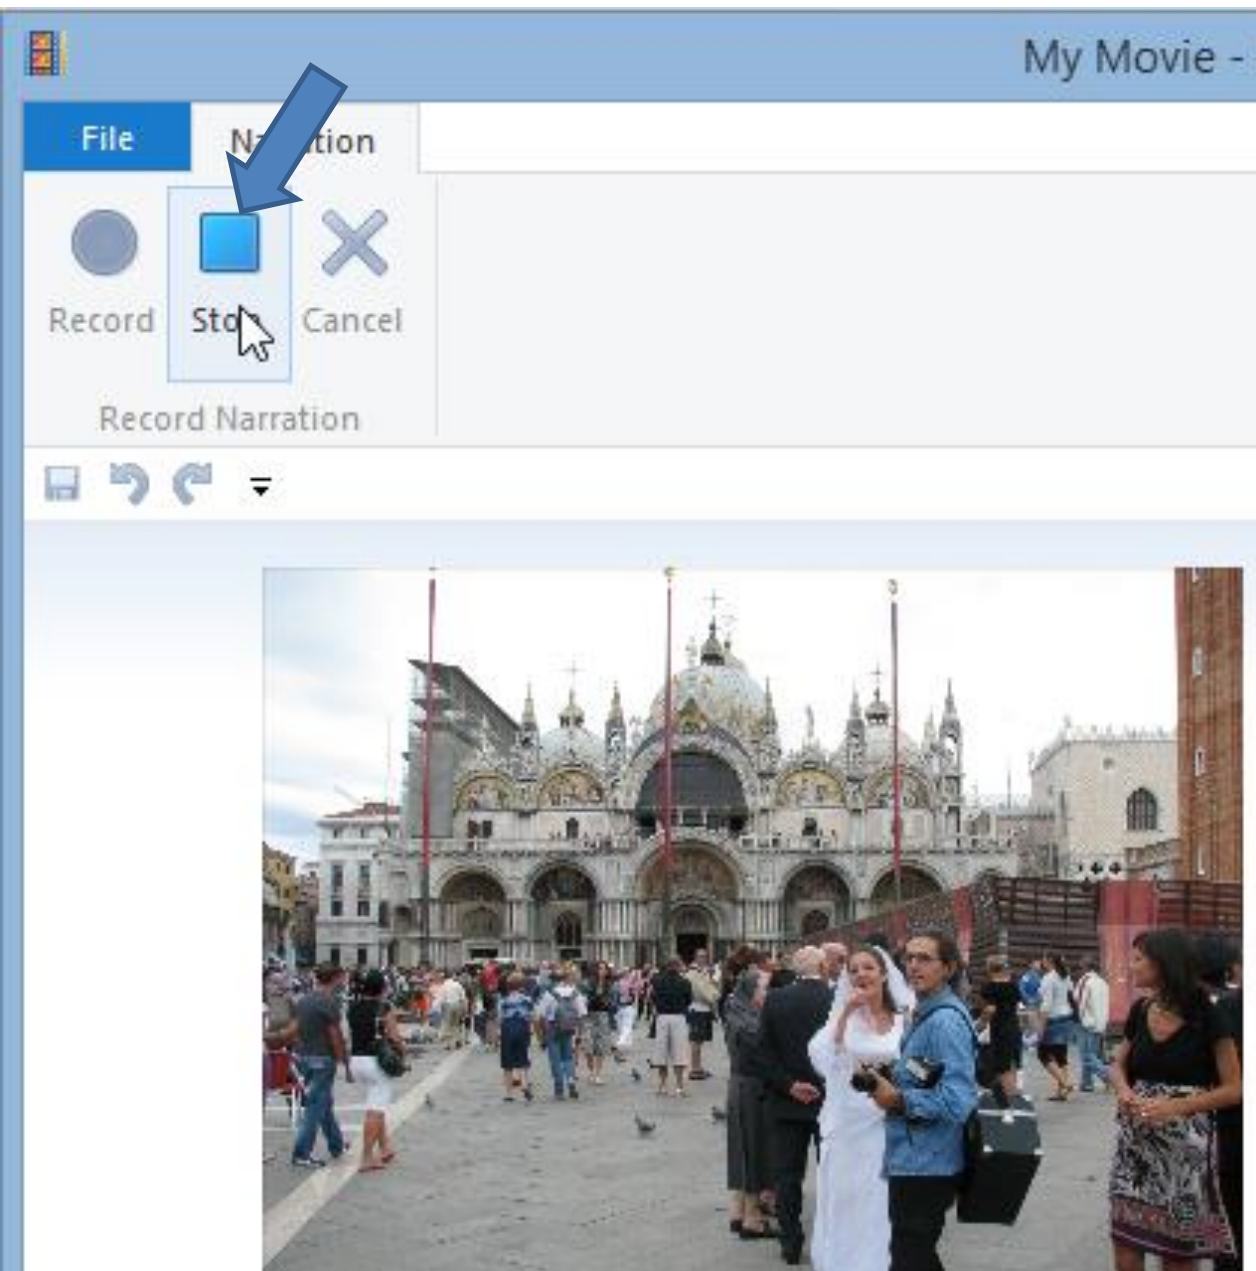

- **Window closes and make sure you are on the Home tab and you see Record narration.**
- **Click on it and next is what happens.**

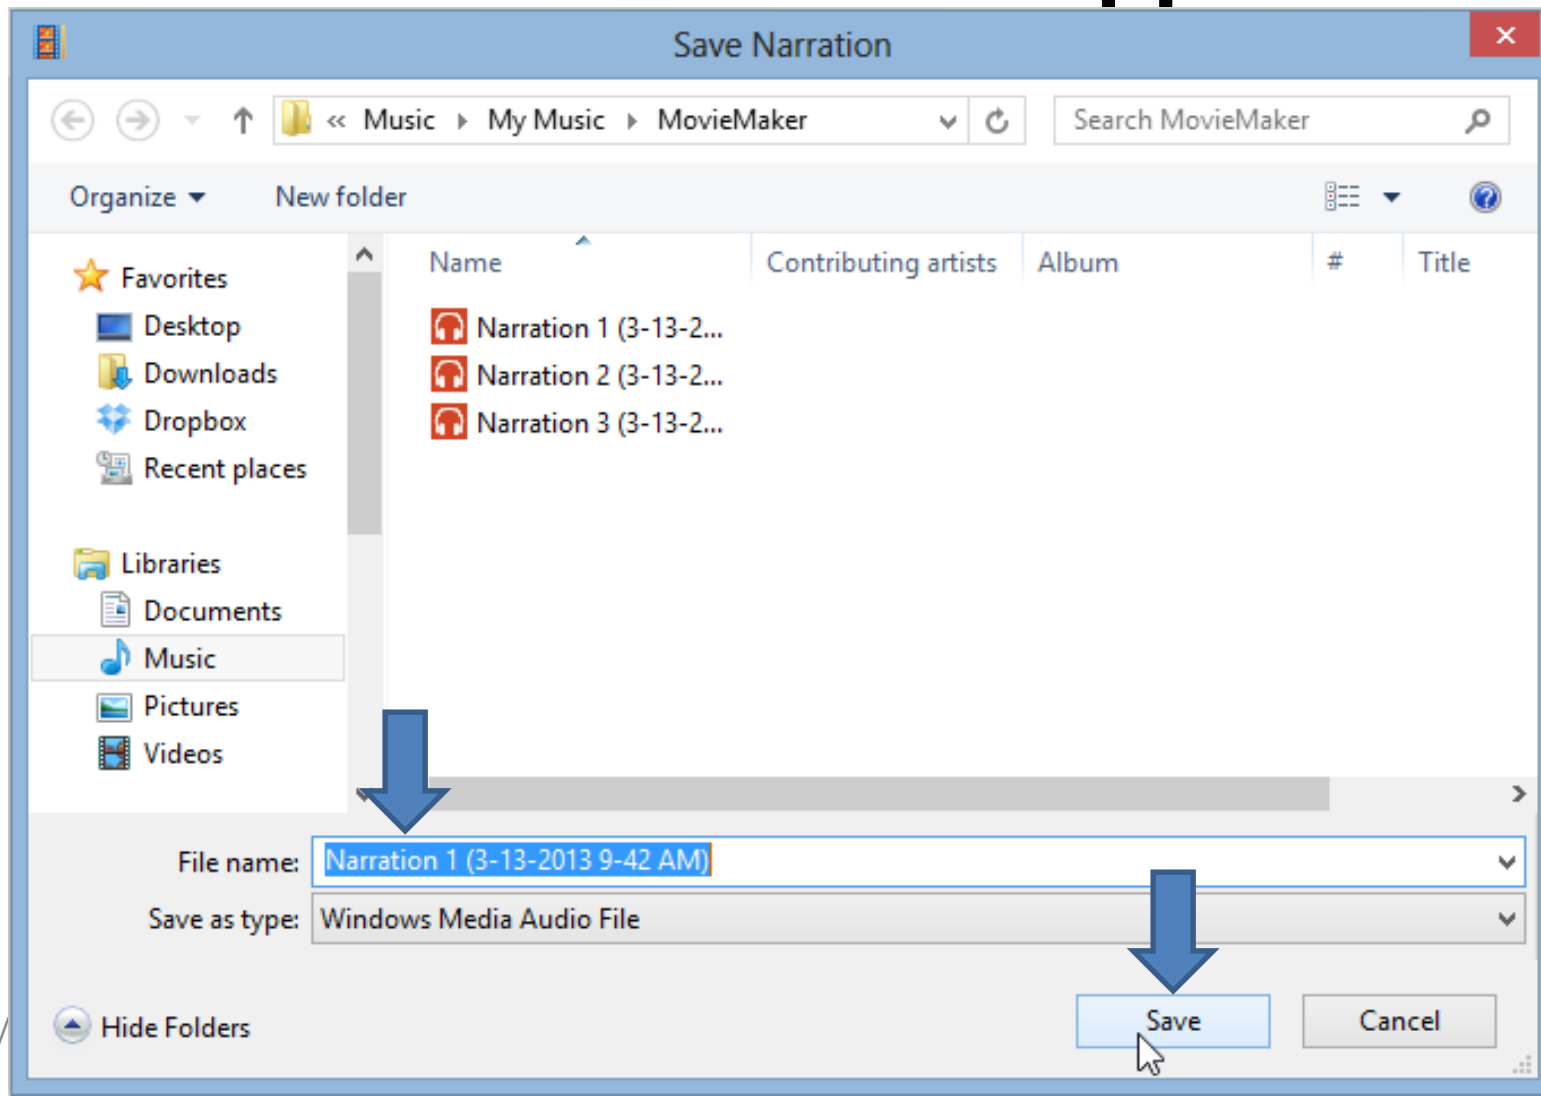

When you click on Record narration, this page opens. You then click on Record to start and start your own Voice/Song. Next is what to do when finished.

Once finished, click on Stop. Next is what happens.

File Explorer opens, you can change folder, and file name, then click on save. Next is what happens.

- It then automatically shows up with a different color, so you know it is a narration.
- This is the End of Step 10 – Part D.
