

# **Step 10 – Edit Videos**

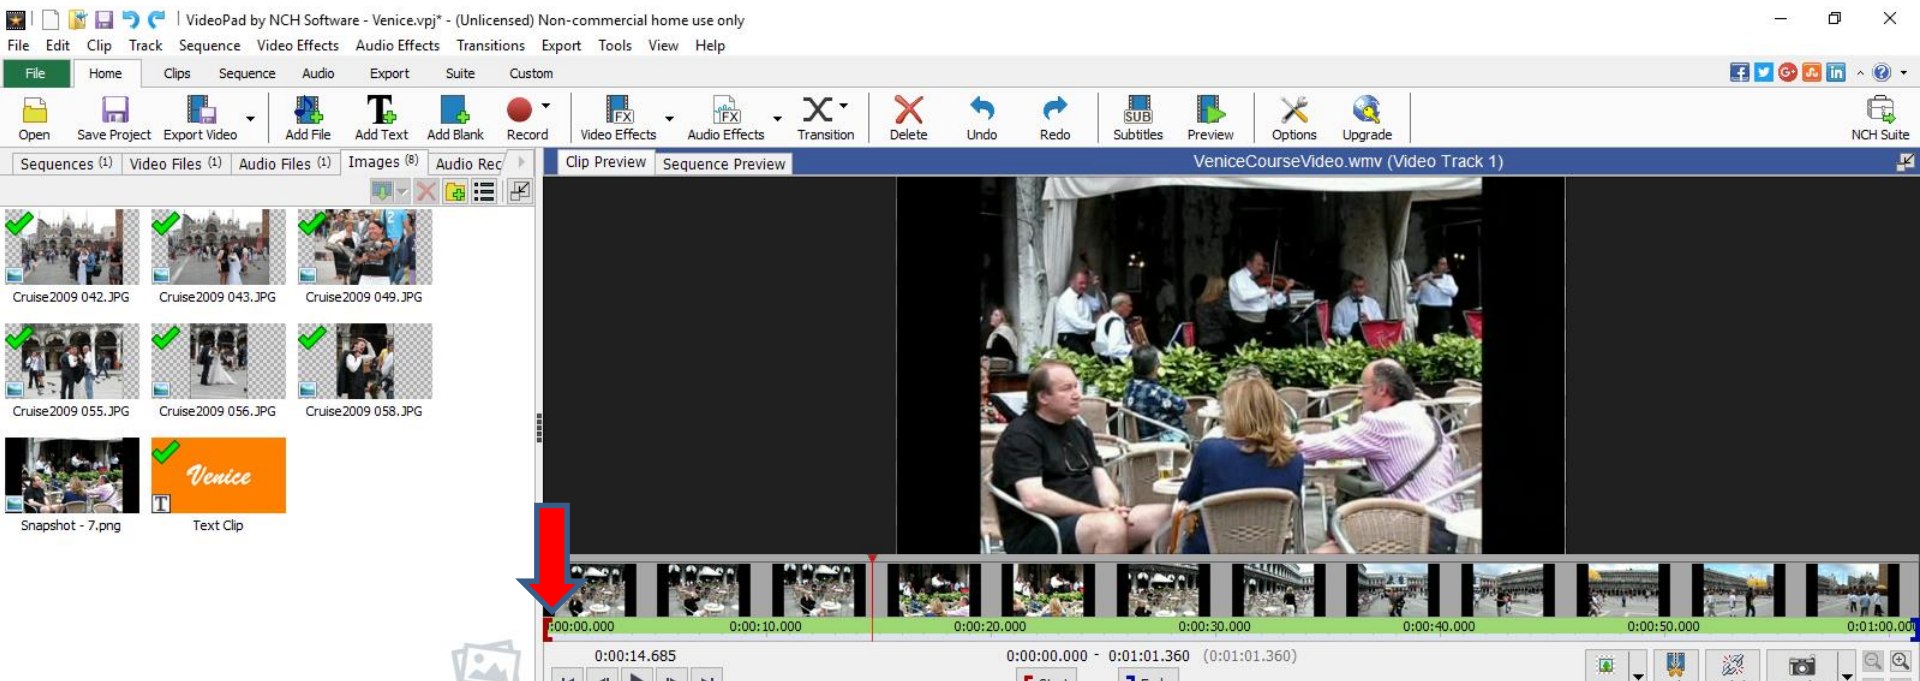

## **Part A – Trim Video**

- **Trim Video is to change the Start of the end of the Video. It is called Trim in Movie Maker and it is a different process. It is not called Trim in VideoPad and it is a different process, but you can do the same thing.**
- **Next is how to change the Start of the Video.**

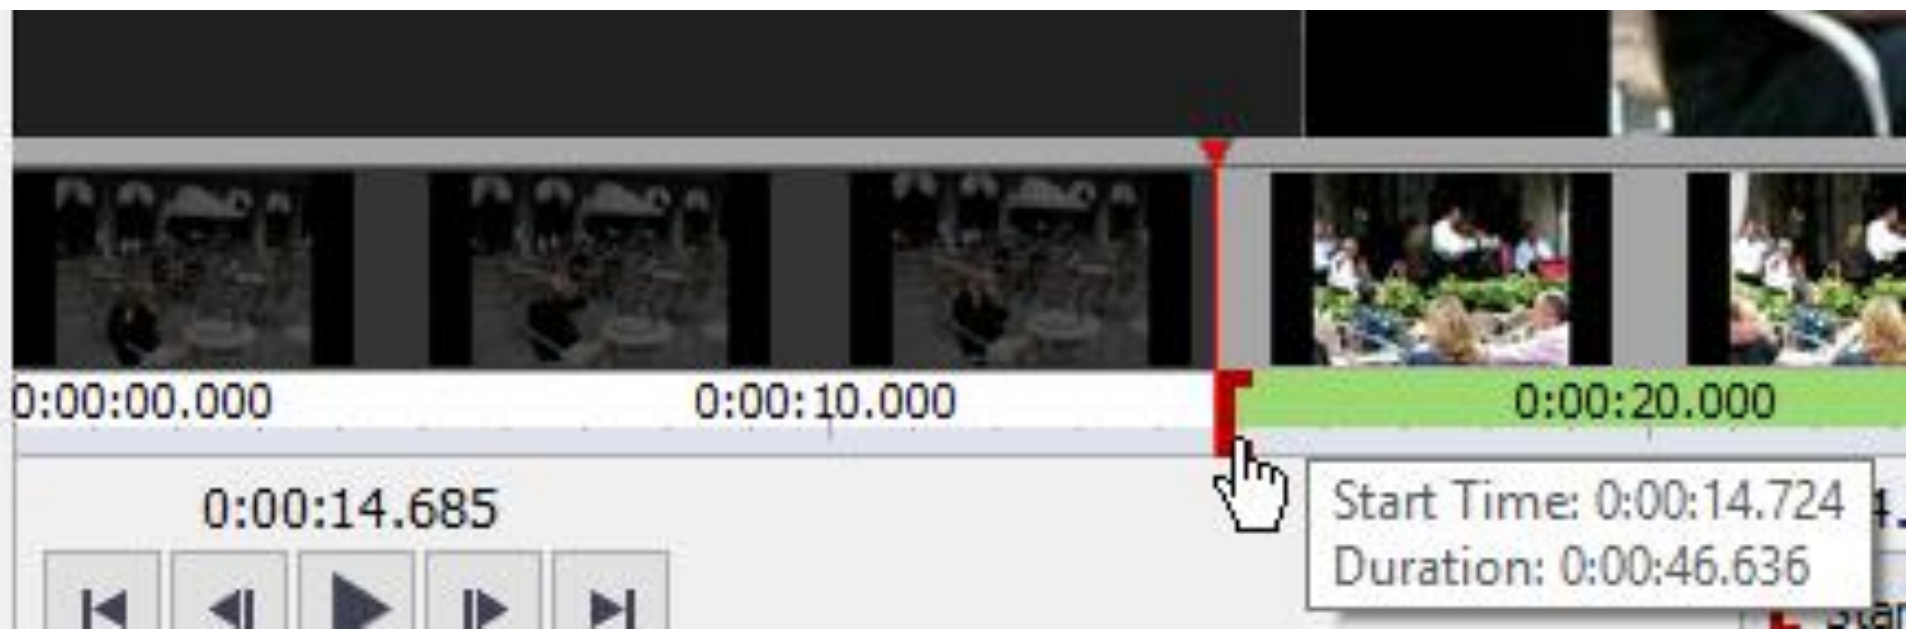

- This is what it is like that I showed in Step 9 – Part C. If you don't see the video on the top, double click on the video on the bottom to see it. Next is how to change the Start.

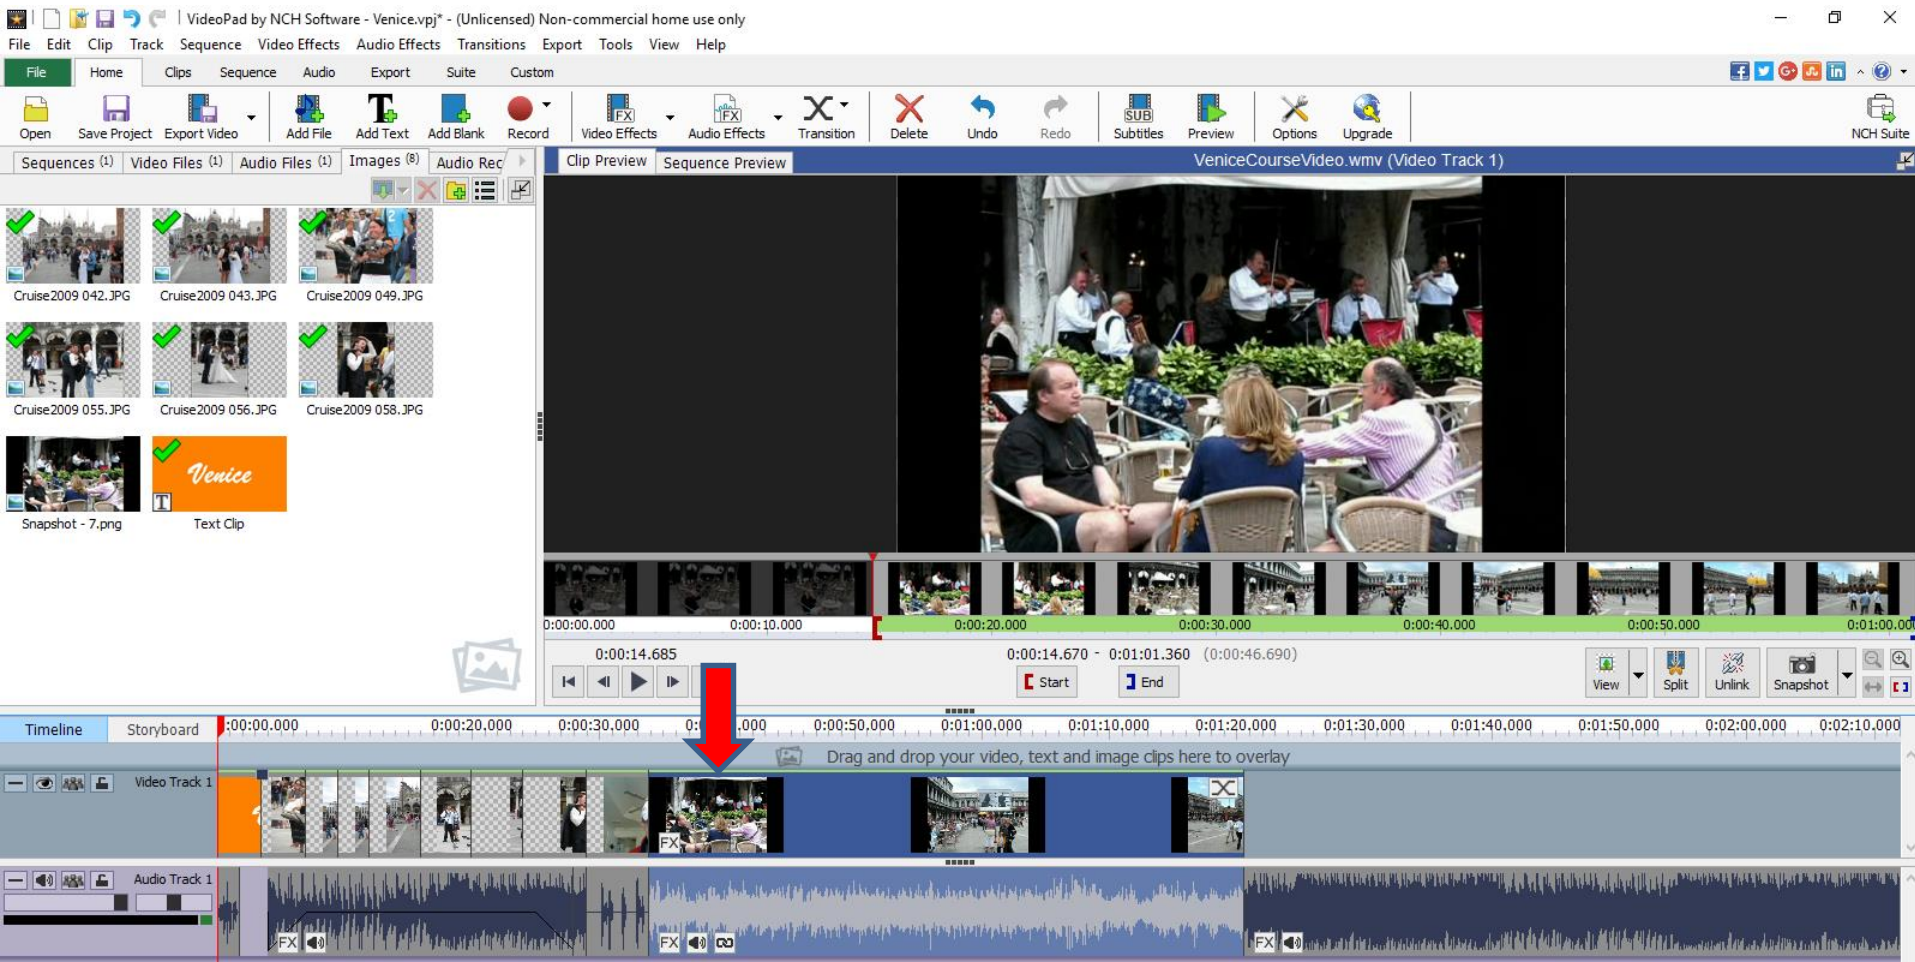

- You left click and hold down on the this icon  on the left and drag it to the right to the point that you want to Start.
- Next, I will zoom in so you see it and show you a sample of dragging to the same place that we did the Snapshot.

- Below is a sample to dragging it to the right and you see the Start Time is different.
- Next is what happens when you let go of dragging.

- You see the first part of the video is removed at the bottom and the start is different, but it is not removed on the Video Files.
- Next is how to change the End.

- To change the End, you left click on this icon  on the right and hold it down and drag it to the left to the point you want to End.
- Next is a sample of what happens.

- Here is a sample to this point and you see the End Time is different.
- Next is what happens when you let it go.

0:00:14.707 0:00:14.778 - 0:00:58.468 (0:00:43.690)

Start End

End Time: 0:00:58.468  
Duration: 0:00:43.690

- You see the last part of the video is removed at the bottom and the End is different, but it is not removed on the Video Files.
- This is the End of Step 10 – Part A.
