## Part B – DVD Maker

- DVD Maker comes with Windows 7. It does not work with Windows 8 or 10.
- You can export a Video on VideoPad in Windows 7 to your computer, which is Step 8.
- First I will show you how to open DVD Maker in Windows 7.

#### Programs (1)

#### 👩 Windows DVD Maker

#### Control Panel (7)

- 📷 AutoPlay
- 📾 View devices and printers
- 🖶 Device Manager
- 😨 How to add new hardware
- 🔣 Change default settings for media or devices
- Play CDs or other media automatically

#### Documents (24)

- Convert VHS to DVD Course.pptx
- Convert VHS to DVD Course Introduction.avi
- Convert VHS to DVD Course Introduction.avi
- 🗟 Convert VHS to DVD Course Introduction.pptx
- 📗 DVDMaker

#### Music (16)

- Fred Marcelle John B Feb 24 1998.MP3
- Fred Marcelle Saudi May 26 1978.MP3
- Fred Marcelle Saudi Jan 27 1 1978.MP3
- 🔰 Gordon Kelly Father's Day.MP3
- Fred Marcelle Saudi Jan 27 2 1978.MP3

#### See more results

- Click on Start Menu in Windows 7.
- Then Type in DVD.
- You then see it.
- Then click on it.

- At the bottom you can highlight and change the DVD title.
- You also see on the left the number of minutes. Typically the limit on a DVD is about 150 minutes.
- Next is Menu Style

• Click on Next in the lower right.

### Window changes and you see Menu Styles on the Right.

 Click on navigation bar on the right and scroll down to find a menu that you like.

• Here is one I like. You then click on it.

You then see the results.

## Next is to Preview and then Burn

#### • Click on Preview in the upper left.

	C. S.	

• You then see the two "Videos"

• You then see the two "Videos". Click on one on the right.

• You then see it playing.

• Then click on the arrow in upper left to return to previous page.

### You are now ready to burn the DVD. Note – as I mentioned before, do not do the next step, even on your laptop.

### You should insert a DVD first, then click on Burn in the lower right.

 If you did not insert a disc, this window popsup. This is the End of Part B.
