

Step 5 – Add Effects – Part A – Transitions

- It doesn't add Transitions to the Title. It adds it to the image after the Title.**
- If you did not have a Title, it does not add Transitions to the first image and adds it to the second image.**
- First click on the Title and then click on Transition, which is next.**

- When you click on Title and then click on Transition, you see the Transition options. You hover over them to view it. The Duration is 1 second and you can change it. Next is when you find one you want.

• When you find one you want, like Heart, click on it and next is what happens.

- When you click on it, then click on Play and you will then see the Transition.
- If you want to add Transition on the second image, you have to click on the first image and follow the same process. This is the End of Step 5 – Part A.
