

YouTube Introduction

- YouTube has about 1 Billion accounts and about 7 Billion Videos. If you don't have a Google Account, like Gmail, you can go to the YouTube website and search for Videos and play them. You can also share a Video and send it to friends or family by email. Step 1 shows you how to do that.**
- If you have a website, you also can embed a YouTube Video to your website. I have other on-line training for the Build Website Free that shows you how to embed the YouTube Video.**
- If you don't have a YouTube account, I recommend you create an account, which I will show you in Step 2. The reason to create a YouTube account is you can do other things, which is next.**

- **If you have a Google Account, like Gmail, you can go to the YouTube website and have an account. When you have a YouTube account, you can upload a Video YouTube from your computer. It only allows 15 minutes on the Video. But, you can change it longer on your account. Step 3 shows you how to do upload a Video and change it longer on your account. You can also edit the Video on YouTube and download it to your computer. Step 4 shows you how to do that. YouTube use to allow you to create a slideshow Video on your account, but for some reason they removed it.**
- **If you have a Google Account, you also can download free music. Step 5 shows you how to do that. Next is other options.**

- **You can download any Videos from YouTube to your computer using a different program, called ClipGrab. Step 6 shows how to download ClipGrab and download Videos from YouTube to your computer. You can convert the Video to Music using a different program, called Free Video To MP3 Convert. Step 7 shows you how to download Free Video To MP3 Convert and how to Convert the Video to a MP3 file.**
- **This is the End of the Introduction.**
